

stabilized
chlorinating
tablets

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling

**PRECAUTIONARY STATEMENTS
 HAZARDS TO HUMANS AND
 DOMESTIC ANIMALS**

Danger
 Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES permit. For guidance contact your regional office of EPA.

PHYSICAL AND CHEMICAL HAZARDS

Strong oxidizing agent. Mix only with water. Use only in well-ventilated areas. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat, generation of hazardous gases and possible generation of fire explosion. In case of contamination or decomposition do not reseal container. If possible isolate container in open air or well ventilated area. Flood with large volume of water if necessary.

ACTIVE INGREDIENT	
Trichloro s triazinethione*	99.5%
INERT INGREDIENT	
AVAILABLE CHLORINE	0.5%
	100.0%

**KEEP OUT OF REACH OF CHILDREN
 DANGER**

Practical Treatment FIRST AID

If swallowed: Feed bread soaked in milk followed by olive oil or cooking oil. Call a physician immediately.
 If on skin: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists get medical attention.
 If in eyes: Flush with cold water for at least 15 minutes. Get medical attention.

SEE ADDITIONAL PRECAUTIONS ON SIDE PANEL

1. STABILIZE pool water. This is necessary to insure maximum effectiveness of tablets. Previously unconditioned pools should be treated with Water Conditioner (cyanuric acid)*.
2. CHECK RESIDUAL CHLORINE with a suitable chlorine test kit. If below 1.0 part per million (ppm), add Dry Chlorine (granular)* to establish residual chlorine at 1.0 to 1.5 ppm.
3. MAINTAIN RESIDUAL CHLORINE at 1.0 to 1.5 ppm by placing 10 Tablets for every 5,000 gallons of water into feeder every 7 to 14 days. Each tablet supplies about 3 ppm available chlorine per 1,000 gallons of water. The number of tablets required for your pool may vary depending on temperature, wind, rain, pool usage and feeding method. Test pool water frequently with a suitable chlorine test kit to assure the proper concentration of available chlorine level at 1.0 to 1.5 ppm. Adjust subsequent additions as necessary.
4. MEASURE pH immediately and at least once each week with a suitable test kit. Adjust pH to 7.2 to 7.6. Use suitable agents such as Dry Acid* to reduce pH and Soda Ash* to increase pH.

STORAGE AND DISPOSAL

Keep product dry in tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of a decomposition isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area or bury in a safe place.
