STATEMENT OF PRACTICAL TREATMENT

IF SWALLOWED: Drink a large amount of milk or water. Do not induce vomiting because of aspiration hazard. CALL A PHYSICIAN IMMEDIATELY. If patient experiences difficulty in breathing, start mouth to mouth artificial respiration or administer oxygen. NOTE TO PHYSICIAN: Atropine is antidotal only if signs of cholinesterase inhibition are present.

IF INHALED: Remove victim to fresh air. Apply artificial respiration if needed.

IF ON SKIN: Wash immediately with soap and water.

IF IN EYES: Flush with plenty of water. SEE A PHYSICIAN IMMEDIATELY.
