NOTICE OF PESTICIDE: REGISTRATION
 REREGISTRATION
(Under the Federal Insecticide, Fungicide,
and Rodenticide Act, as amended)

NAME OF PESTICIDE PRODUCT

Granular Stabilized
Chlorinator

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

Pool Time Products, Inc.
P.O. Box 887
Scottdale, GA 30079

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:

1. Submit/cite all data required for registration/reregistration of your product under FIFRA section 3(c)(5) when the Agency requires all registrants of similar products to submit such data; and submit acceptable responses required for reregistration of your product under FIFRA section 4.

2. Add the phrase, "EPA Registration No. 43973-1" to your label before you release the product for shipment.

3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the pesticide registered under EPA Reg. No. 43973-1

GRANULAR STABILIZED CHLORINATOR GRANULATED SANITIZER FOR ROUTINE USE IN ALL POOLS

Pool Time

ACTIVE INGREDIENT: _____
 Sodium Dichloro-S-Triazetrione 98.0%
INERT INGREDIENTS: _____ 4.0%
TOTAL 100.0%
 Available chlorine 62 %

Net Weight: 5 LBS. (2.27 kg)

**KEEP OUT OF REACH OF CHILDREN
DANGER**

STATEMENT OF PRACTICAL TREATMENT: If Swallowed: Drink large amounts of water. Avoid alcohol. DO NOT induce vomiting. Call a physician or poison control center immediately. If Contact With Eyes Occurs: Flush with cold water for at least 15 minutes. Get medical attention. If Contact With Skin: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If Irritation persists, get medical attention. See additional precautionary statements on back panel.

BEST AVAILABLE COPY

WHY To Use This Product

As fast-dissolving, stabilized granular chlorinator (62% available chlorine) is the most efficient type of sanitizer for use in pools where scoop application is used. It reduces chlorine loss due to sun light and other environmental factors better than unstabilized chlorinators such as calcium hypochlorite or liquid chlorine (bleach), and has less effect on pH balance. More concentrated (90% available chlorine), stabilized chlorinators are available.

HOW To Use This Product

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

START-UP / INITIAL TREATMENT: Before using this product to open your pool. Pool Time (PT) recommends: 1. Check pool structure and equipment, clean filter (using PT Filter Cleaner/Degreaser if needed). Also clean pool walls and bottom thoroughly and get fresh PT reagents for your test kit. 2. If water is cloudy or green, shock (superchlorinate) pool with appropriate shock product. 3. Test total alkalinity (TA) and adjust if needed with total alkalinity increaser to raise TA or pH down to lower TA. 4. Test pH and adjust to between 7.4 and 7.6 with pH down to lower pH or pH up to raise pH. 5. Add chlorine stabilizer (dry cyanuric acid) if test shows stabilizer level below 40 ppm. **IMPORTANT** — All sanitizers work better if chlorine is stabilized at the beginning of the pool season. 6. Shock pool with the shock product for your type of pool. 7. Broadcast 4 ounces of this product per 10,000 gallons of water with a scoop. Repeat until your test kit indicates an available chlorine level of 1.0 to 2.0 ppm. 8. When chlorine level is adjusted to 1.0 - 2.0 ppm, add the algaecide appropriate to your needs.

ROUTINE MAINTENANCE: Check your pool at least weekly with a test kit. Broadcast Pool Time Granular Stabilized Chlorinator with a scoop when the available chlorine level falls below 1.0 ppm. Use the Chart below as a dosage guideline to maintain available chlorine at 1.0 to 2.0 ppm.

**APPROXIMATE WEEKLY DOSE OF
 POOL TIME CLARITY STABILIZED CHLORINATOR GRANULES**

Appx. Pool Size	Appx. Gallons	Water 60-70°	Water 70-80°	Water 70-90°
14 x 28	15,000	3 oz.	14 oz.	20 oz.
16 x 32	20,000	10 oz.	18 oz.	27 oz.
18 x 36	30,000	15 oz.	27 oz.	40 oz.
20 x 40	35,000	16 oz.	32 oz.	47 oz.
24 x 48	45,000	23 oz.	41 oz.	51 oz.

In addition to routine use of this product as directed, PT recommends:

- At least once a week, test pH and adjust to between 7.4 and 7.6 with PT pH DOWN to lower pH or PT pH UP to raise pH.
- Every 2-3 weeks, test total alkalinity (TA) and adjust with PT TOTAL ALKALINITY INCREASER to raise TA or pH DOWN to lower TA.
- Every 2 weeks, shock pool with the shock product for your type of pool.
- Once a week, add the algaecide appropriate to your needs.

STORAGE AND DISPOSAL:

Keep this product dry in a tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. In case of decomposition, isolate container (if possible) and flood area with large amounts of water to dissolve as material before discarding this container. **DO NOT REUSE CONTAINER**, but place in trash collection. Do not contaminate water food or feed by storage and disposal.

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if inhaled. Do not get in eyes, on skin or on clothing. Wear goggles or safety glasses and rubber gloves when handling this product. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or salt water unless this product is specifically identified and addressed in an NPDES permit. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARDS—STRONG OXIDIZING AGENT: Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals will start a chemical reaction and generate heat, chlorine gas (and possible fire and explosion). In case of contamination or decomposition, do not reuse container. If possible, isolate container in open air or well ventilated area. Flood area with large volumes of water, if necessary.

How to Determine Pool Capacity

Shape of Pool	Compute Total Gal. of Water By Multiplying by:
Rectangle	Length x Width x Average Depth x 7.5
Round	Diameter x Diameter x Average Depth x 5.9
Oval	Long Dia. x Short Dia. x Average Depth x 5.9
Irregular	Consult with pool builder
