and Rodenticide Act, as amended)

NAME OF PESTICIDE PRODUCT

3" Stabilized Chlorinator Tablets

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

Pool Time Products, Inc.
P.O. Box 887
Scottdale, GA 30079

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA section 3(c)(7)(A) provided that you:

1. Submit/cite all data or other material required for registration/reregistration of your product under FIFRA section 3(c)(5) and FIFRA section 4 when the Agency requires all registrants of similar products to submit such data.

2. Add the phrase "EPA Registration No. 43973-4" to your label before you release the product for shipment.

3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

WHY To Use This Product

This slow-dissolving, stabilized chlorinator (90% available chlorine) is the most efficient type of sanitizer for pools with automatic feeders, floaters or plastic skimmers. It reduces chlorine loss due to sun light and other environmental factors better than unstabilized chlorinators such as calcium hypochlorite or liquid chlorine (bleach), and has less effect on pH balance. These slow-dissolving tablets, plastic-wrapped for safety and odor protection, are also available in 1" size for use in feeders or floaters, but NOT plastic skimmers. For pools without feeders, an organic, stabilized but less concentrated (82% available chlorine) chlorinator is available in granular form -- POOL TIME GRANULAR STABILIZED CHLORINATOR.

HOW To Use This Product

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

START-UP/INITIAL TREATMENT: Before using this product to open your pool, POOL TIME (PT) recommends: 1. Check pool structure and equipment, clean filter (using PT Filter Cleaner/Degreaser if needed). Also clean pool walls and bottom thoroughly and get fresh PT reagents for your test kit. 2. If water is cloudy or green, shock (superchlorinate) pool with appropriate PT SHOCK product. 3. Test pH and adjust to between 7.4 and 7.6 with PT pH DOWN to lower pH or PT pH UP to raise pH. 4. Add PT CHLORINE STABILIZER (dry cyanuric acid) if test shows stabilizer level below 40 ppm. **IMPORTANT** -- All chlorinations work better if water is stabilized at the beginning of the pool season. 5. Test total alkalinity (TA) and adjust if needed with PT TOTAL ALKALINITY INCREASER to raise TA or PT pH DOWN to lower TA. 6. Shock pool with the PT SHOCK product for your type of pool. 7. Test chlorine level and add 3" Tablets (unwrapped) to feeder or floater to bring level to 1.0 - 3.0 ppm. If pool has a plastic skimmer, use one 3" tablet per 10,000 gallons of pool water. 8. When chlorine level is adjusted to 1.0 - 3.0 ppm, add the PT ALGICIDE appropriate to your needs.

ROUTINE MAINTENANCE: Remove plastic wrap and fill feeding device with enough 3" Tablets to assure constant treatment level of 1.0-3.0 ppm available chlorine. Chart below gives dosage guidelines. Weather and pool use affect sanitizer levels, so test pool water and check feeding device often and refill as needed.

APPROX. WEEKLY DOSE - PT STABILIZED CHLORINATOR TABLETS*

Approx. Pool Size	Approx. Gallons	Water 60°-70°	Water 70°-80°	Water 80°-90°
14 x 28	15,000	5 oz.	8 oz.	14 oz.
16 x 32	20,000	7 oz.	12 oz.	18 oz.
18 x 36	30,000	10 oz.	18 oz.	27 oz.
20 x 40	35,000	12 oz.	21 oz.	31 oz.
24 x 48	45,000	15 oz.	27 oz.	41 oz.

* Each 3" tablet weighs about 6 ounces.

In addition to routine use of this product as directed, PT recommends:

1. At least once a week, test pH and adjust to between 7.4 and 7.6 if needed with PT pH DOWN to lower pH or PT pH UP to raise pH. 2. Every 4 weeks, test water stabilization and add PT CHLORINE STABILIZER if needed. 3. Every 4 weeks, test for total alkalinity (TA) and adjust if needed with PT TOTAL ALKALINITY INCREASER to raise TA or PT pH DOWN to lower TA. 4. Every 2 weeks, shock pool with the PT Shock product for your type of pool. 5. Once a week, add the PT ALGICIDE appropriate to your needs.

DO NOT ADD OTHER CHEMICALS through the skimmer when using this product - an explosion might occur. Use this product in skimmer only, if skimmer and the piping between skimmer and pump are plastic. IN VINYL POOLS, do NOT leave pump turned OFF for more than 8 hours when this product is in the skimmer.

STORAGE AND DISPOSAL: Keep product dry in a tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. In case of decomposition isolate container (if possible) and flood area with large amounts of water to dissolve all materials before discarding this container. Do not reuse empty container but place in trash collection. Do not contaminate food or feed by storage or disposal, or cleaning of equipment.

PRECAUTIONARY STATEMENTS

H HAZARDOUS TO HUMANS AND DOMESTIC ANIMALS

DANGER

KEEP OUT OF REACH OF CHILDREN

Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust or fumes. Remove and wash contaminated clothing before reuse.

PHYSICAL AND CHEMICAL HAZARDS--STRONG OXIDIZING AGENT: Mix only with water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction, with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In cases of contamination or decomposition, do not reuse container. If possible, isolate container in open air or well ventilated area. Flood with large volumes of water if necessary.

STATEMENT OF PRACTICAL TREATMENT: If swallowed: Drink promptly a large quantity of water. DO NOT induce vomiting. Never give anything by mouth to an unconscious person. Avoid alcohol. Call a physician immediately. If on skin: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention. If in eyes: Flush with cold water for at least 15 minutes and get prompt medical attention.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or public waters unless this product is specifically identified and addressed in an NPDES Permit. Do not discharge effluent containing this product into sewer systems without previously notifying the sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.
