WT.

ODORLESS • NON-STAINING • NON-FLAMMABLE

## CAUTION

**HAZARD TO HUMANS AND DOMESTIC ANIMALS**  
Harmful if swallowed. Wash thoroughly after handling. Apply only in areas not accessible to children and pets. Avoid contamination of food and feedstuffs. Kills vegetation - do not use on plants, in flower pots, or contaminate water.

### DISPOSAL

Do not use empty container. Wrap and place in trash.

### DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with the labeling directions.  
**SHAKE CONTENTS WELL BEFORE OPENING AND OPEN CONTAINER CAREFULLY.** Lightly dust, sprinkle with a teaspoon, or apply with a commercial applicator (battery bulb filler) the powder in the backs, corners and cracks of pantries, cabinets, and under all storage units. Apply behind and under all appliances and heavy seldom moved furniture. Apply in all open cracks and crevices wherever Roaches crawl or hide. Apply where paper supplies are stored and in dark and hidden areas where food is eaten. Apply in the garage areas where insects may crawl or hide. Any powder visible after application must be brushed in cracks and crevices or removed. Do Not clean away the hidden powder. It will remain effective as long as it remains undisturbed and dry. It may take 3 to 4 weeks to reduce serious infestation since eggs already laid must hatch before new roaches can be exposed to the poison. Do not use in edible products areas of restaurants or other areas where is commercially prepared or processed. Do not use in serving areas while food is exposed. Reapply as necessary.

**NEW CONSTRUCTION - COMMERCIAL - PUBLIC HOUSING ATTIC AND SUB-FLOOR VOIDS:** Blow dust, using a power duster, into attic and sub-floor areas such as crawl spaces to prevent infestation from roaches, ants and silverfish. Roach-I-Cide has properties that help it adhere to most surfaces. Enough dust should be used to visibly coat all surfaces where protection is desired. Use 1 pound per 500 feet.
