

PRECAUTIONARY STATEMENTS**HAZARDS TO HUMAN AND DOMESTIC ANIMALS**

CAUTION: May be harmful if swallowed. Do not take internally. Do not breathe dust. Avoid contact with eyes, skin or clothing. Wash contaminated clothing before re-use. Wash thoroughly after handling and before eating or smoking. Keep children and pets off treated areas until this material is washed into the soil and the grass is dry. Do not contaminate feed or foodstuffs. Do not use treated areas or clippings from treated areas for feed or forage.

ENVIRONMENTAL HAZARDS

Do not contaminate water by cleaning of equipment or disposal of wastes. This product is toxic to fish, birds, and wildlife. Do not apply directly to any body of water. Do not apply where runoff is likely to occur. Use only as directed on this label. Do not use on crops used for food or forage.

STATEMENTS OF PRACTICAL TREATMENT

IF SWALLOWED: Call a physician or Poison Control Center immediately. Induce vomiting by giving victim 1 or 2 glasses of water and touching back of throat with finger. Do not induce vomiting or give anything by mouth to an unconscious or convulsing person.

IF IN EYES: Flush eyes with plenty of water. Get medical attention.

IF ON SKIN: Remove contaminated clothing and wash affected area with soap and warm water. Wash clothing before re-use.

IF INHALED: Remove victim to fresh air. Apply artificial respiration if indicated. Get medical attention immediately.

NOTE TO THE PHYSICIAN: Prolonged exposure will cause cholinesterase depression. Atropine Sulfate is antidotal. 2-PAM is also antidotal and may be administered in conjunction with atropine.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. **STORAGE:** Store in its original container in a cool, dry, locked place out of reach of children. **PESTICIDE DISPOSAL:** Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. **CONTAINER DISPOSAL:** Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incineration, or, if allowed by State and local authorities, by burning. If burned, stay out of smoke. **HOUSEHOLD:** Do not re-use empty bag. Wrap and put in trash.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

SURFACE FEEDING INSECTS

Sod Webworms are capable of destroying large areas of turf. They live through the winter as a worm and change to a moth in May. Eggs are deposited very soon throughout the lawn and new worms hatch in May. By killing this first "brood" it is possible to reduce the worm population of later broods and therefore reduce turf damage.

WHITE GRUB CONTROL INSECTICIDE

Contains Trichlorfon Insecticide

ACTIVE INGREDIENTS:

Trichlorfon: Dimethyl (2,2,2-trichloro-1 hydroxy-ethyl phosphonate).....6.20%

INERT INGREDIENTS.....93.80%

TOTAL 100.00%

**KEEP OUT OF REACH OF CHILDREN
CAUTION**

**NET WEIGHT POUNDS
STORE IN A DRY PLACE**

EPA Reg. No. 44215-

EPA EST. No. 44215-KS-1

manufactured by

1801 South 2nd St

KAW VALLEY
Inc

Under the Federal Insecticide, Fungicide, and Rodenticide Act as amended, for the pesticide registered under EPA Reg. No. 44215-145

1 FEB 22 1989

HOW TO APPLY

Turf should be free of troublesome thatch which encourages insects. Rake or de-thatch the area and remove the debris to expose insect hiding places. Water the lawn and cut to proper height. Apply granules as recommended and sprinkle the area to move the insecticide down to the soil surface where insects feed.

HOW MUCH TO APPLY

For control of Sod Webworms (Lawn Moth Larvae), and Cutworms apply at the rate of 2 pounds/1,000 sq. ft. of turf. (15 lb. bag treats 7,500 sq. ft.) Refer to chart for respective spreader settings. Make sure your spreader is calibrated for this product before application.

WHEN TO APPLY

Treat in the spring (mid-March to June) or when your "Lawn Program" calls for a surface insect control application. Repeat as the program indicates or as needed for control. Sod Webworm may have 3 to 4 generations of larvae in 1 year which will require additional treatments at 30 to 40 day intervals during the summer months. Therefore repeat as needed for continued protection of lawn. Lightly sprinkle the area after treatment as soon as possible to move the insecticide into the zone of insect infestation. Do not allow children or pets on treated areas until material has been sprinkled in and the grass is dry.

WHITE GRUB LARVAE CONTROL IN THE TURF

FOR ROOT FEEDING "White Grub" insect larvae of JAPANESE BEETLE, EUROPEAN CHAFER & SOUTHERN CHAFER apply 3 lbs /1,000 sq. ft. of turf. Make sure your spreader is properly calibrated to apply this product. Irrigate the turf after treatment as soon as possible to wash the insecticide into the root zone where the insects are feeding. Apply when the White Grub Larvae are young and actively feeding near the soil surface in mid-July and early August. Consult your Agricultural Extension Service for the best time to treat for "Grubs" in your area. A second treatment at the same rate may be needed for mature large sized grubs.

HOW TO APPLY: IMPORTANT...

Do not attempt to control White Grubs in turf that has over 1/2 to 3/4 inch thatch build up since heavy thatch will prevent the insecticide from penetrating down to the area where the insects are feeding. Therefore, troublesome thatch must be removed before treating for White Grubs. If thatch is not removed before treatment, poor "Grub" control will result.

Spreader	Root Feeding Insects Per 5,000 Sq. Ft. (2.0 lbs./1,000 Sq. Ft.)	Surface Feeding Insects Per 7,500 Sq. Ft. (3.0 lbs./1,000 Sq. Ft.)

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an endorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(C) provided that you:

1. Submit and/or obtain all data required for registration/reregistration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data.
2. Make the labeling changes listed below before you release the product for shipment:
 - a. Add the phrase "EPA Registration No. 14215-145".
 - b. Delete "s" and "Active Ingredients".
 - c. Delete "Ingredients" from your ingredient statement.

Submit a copy of your final printed label to the Agency for review and approval. Refer to the Agency for further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(c). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.
