NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:

1. Submit and/or cite all data required for registration/reregistration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data.
2. Make the labeling changes listed below before you release the product for shipment:
 - a. Add the phrase "EPA Registration No. 44313-11."
 - b. You must revise your label to comply with PR Notice 83-3 label statement requirements for storage and disposal (notice attached).
3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 Enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING: Causes substantial but temporary eye injury. Do not get in eyes or on clothing or skin. Wear goggles or face shield when applying. Wash thoroughly with soap and water after handling and before smoking or eating. Remove contaminated clothing and wash before reuse. Avoid contamination of food, utensils, and food preparation areas.

PHYSICAL OR CHEMICAL HAZARDS: Contents under pressure. Do not puncture or incinerate container. Do not use or store near heat or open flames. Exposure to temperature above 130°F may cause bursting. Do not spray on plastic, painted or varnished surfaces. Do not spray directly into any electronic equipment such as radios, televisions, computers, motors or into outlets and switches or any other location where the powdery residue may foul or short electric contacts and circuits.

DIRECTIONS: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL: Store in a cool area away from heat or open flame. Do not reuse empty container. Wrap container and put in trash collection.

Shake well before use. Before storing after use, invert container and spray until only air comes out to clear valve and spray nozzle. Spray in Upright Position Only.

HOW TO USE BORID TURBO

Borid Turbo is for use only with injection tube and for injecting into cracks and crevices and void spaces where insects may be hiding, lying, and breeding. Place injector tip 1/2" into cracks, crevices, holes and other small openings where insects may be a problem. Release approximately 1 second spray per spot. In serious infestation, place spots approximately 12" apart. In light infestation or preventive treatment, place spots approximately 3 ft. apart. In long running cracks, move the injector tip along the crack while spraying. Move at the rate of 1 linear foot per second in heavy infestation of 3 ft. per second in light infestation. This power spray leaves a white residue. Should reapplication occur, wipe off visible residue. See the additional directions below for effective kill of specified insects.

CRAWLING INSECTS, COCKROACHES (WATERBUGS), EARWIGS, CRICKETS, SOWBUGS, MILLIPEDES, CENTIPEDES Spray into hiding places such as cracks and crevices, most areas, openings around pipes and sinks, under refrigerators, behind baseboards, coffee makers, meter boxes and manholes. Spray directly on insects in these locations where possible. Apply into crack and crevices, under tables and chairs.

BOOKLICE, SILVERFISH & FIREBRATS: Spray cracks and crevices in baseboards, door frames, bookcases and storage areas. Spray directly on insects in these locations where possible. Repeat as necessary.

ANTS: Spray into trails, nests, and points of entry around doors, windows, structural cracks and crevices. Spray directly on insects in these locations where possible. Repeat as necessary.

GRAIN WEEVILS, FLOUR BEETLES, DRUG STORE BEETLES (in exposed adult and larvae stages) and hibernating stages of **BOXELDER BUGS, ELMLEAF BEETLES, CLUSTER FLIES AND CLOVER MITES** Contact as many insects as possible when treating infested areas such as cracks and crevices. In wall voids, around windows and door frames, under siding, in machinery, and in dark secluded areas. Repeat as necessary.

Localized treatment of wood-destroying insects **CARPENTER ANTS, CARPENTER BEES AND TERMITES.** Locate source of infestation. Inject spray 5-10 seconds into insect tunnels and cavities. For Carpenter Bees, seal entrance openings with small pieces of stainless steel wool after application.

VOLUME TREATMENT OF INACCESSIBLE VOIDS (false ceilings, wall voids, equipment voids and attics, crawl spaces and manholes where human contact with treated surfaces will be minimal)

For exposed stages of Cockroaches, Waterbugs, Earwigs, Crickets, Sowbugs, Millipedes, Centipedes, Booklice, Silverfish, Firebrats, Ants, and Beetles. Calculate void horizontal surface area and treat at a rate of 1 second per sq. ft. Spray by placing injection tip into crack or crevice, hole, or other small opening into void space. Repeat use every thirty days. For more economical application in large void areas, use Borid Powder.

APPLICATIONS IN FOOD HANDLING ESTABLISHMENTS: Places other than private residences in which food is held, processed, prepared or served.

FOOD AREAS—APPLICATION-LIMITED TO CRACK & CREVICE TREATMENT ONLY: Includes areas for receiving, storage, packing (canning, bottling, wrapping, boxing), preparing, edible waste storage and enclosed processing systems (mills, dairies, edible oils, syrups). Serving areas (when food is exposed and facility is in operation) also would be considered a food area.

Apply in small amounts directly into cracks and crevices using injection tube in points between different elements of construction, between equipment and floors, openings leading to voids and hollow spaces in walls, equipment legs and bases where insects hide. Care should be taken to avoid depositing the product onto exposed surfaces or introducing the material into the air. Avoid contamination of food or food processing surfaces.

APPLICATION OF THIS PRODUCT IN THE FOOD AREAS OF FOOD-HANDLING ESTABLISHMENTS, OTHER THAN AS A CRACK AND CREVICE TREATMENT ARE NOT PERMITTED.
