NOTICE OF REGISTRATION UNDER THE FEDERAL INSECTICIDE; FUNGICIDE, AND RODENTICIDE ACT

NAME AND ADDRESS OF REGISTRANT

Tifton Chemical Company, Incorporated
Post Office Box 5
Tifton, Georgia 31794

NOTE: Changes in labeling or formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Pesticides Regulation Division prior to use of the label in interstate commerce. In any correspondence on this product always refer to the above registration number.

On the basis of the information furnished by the registrant, the above named economic poison is hereby registered under Section 4 of the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this registration is returned herewith.

Registration is in no way to be construed as an endorsement or approval of this product by this Department. In order to protect the public, the Secretary, on his own motion, may at any time cancel the registration of an economic poison in accordance with Section 4 (c) of the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by a trademark held by others.

The following paragraphs are applicable only when checked:

☐ To expedite registration, this notice is being issued on the basis of the draft submitted with the application. Certain defects, given below, have been noted. These corrections must be incorporated when the printed labeling is prepared. Five copies of the printed labeling must be submitted to complete the file on this product.

☐ The registration for this product is being issued with the understanding that certain defects in the labeling which are noted below will be corrected as soon as possible. Objection is not raised to the use of the present labeling for a reasonable period of time while fully corrected labeling is being prepared. Five copies of the corrected labeling must be submitted.

[Note the correction in the following declaration "...o-p-nitrophenyl..."

Correct the dosage rate, "...1/3 pt. per acre" under the directions for cotton to read "...1 1/3 pt. per acre." We regret the typographical error in item two of our letter of February 14, 1972.

☐ Attachment is applicable.

NOTE TO PHYSICIAN

TREAT SYMPTOMATICALLY

Administer atropine sulfate in large doses TWO to FOUR mg. intravenously or intramuscularly as soon as cyanosis is overcome. Repeat at 5 to 10 minute intervals until signs of atropinization appear. If atropine is not available and may be administered in conjunction with atropine. There is no specific antidote for Eyebright intoxication. DO NOT GIVE NARCOTICS OR TRANQUILIZERS. Paraldehyde is a strong cholinesterase inhibitor affecting the central and peripheral nervous systems and producing cardiovascular depression. The patient should be observed carefully for signs and symptoms of respiratory depression and treated symptomatically. Continuous administration of this product may occur and the patient's painted overactivity is interrupted when the patient is in the adult, and continue to treat with atropine until the patient is fully recovered.

POST TREATED AREA

Consult your State Agricultural Extension Station or Experiment Station regarding posting treated areas.
