

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS
AND DOMESTIC ANIMALS**

DANGER: Corrosive. May cause severe skin irritation or chemical burns to broken skin. Causes eye damage. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling this product. Wash after handling. Avoid breathing vapors. Vacate poorly ventilated areas as soon as possible. Do not return until odors have dissipated.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Keep out of lakes, streams or ponds. Treated effluent may not be discharged into lakes, streams, ponds or public waters without a valid discharge permit. For guidance, contact the regional office of the Environmental Protection Agency.

PHYSICAL AND CHEMICAL HAZARDS:

STRONG OXIDIZING AGENT: Mix only with water according to label directions. Mixing this product with gross filth such as feces, urine, etc., or with ammonia, acids, detergents, or other chemicals may release hazardous gases irritating to eyes, lungs and mucous membranes.

**KEEP OUT OF REACH OF CHILDREN
DANGER**

FIRST AID: If on skin, wash with plenty of soap and water. If eyes, flush with water for at least 15 minutes. Get medical attention. If swallowed, drink large quantities of milk or gelatin solution. If these are not available, drink large quantities of water. Do not give emetics or other antidotes. Notify your physician and get prompt medical attention.

**DIRECTIONS FOR USE
GENERAL CLASSIFICATION**

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.
DIRECTIONS FOR SWIMMING POOL CHLORINATION

- For new pools or for spring start-up, superchlorinate with one (1) pint (16 fl. oz.) of sodium hypochlorite solution for each 3000 gallons of water. This dosage is equivalent to 1.0 ppm available chlorine by weight.
- For Pool Maintenance:
 - A. Adjust pool water pH to 7.6 - 7.2 range and maintain.
 - B. Add manually or by a feeder device this sodium hypochlorite solution at a rate to maintain an available chlorine residual of 0.8 to 1.0 ppm. One-fourth pint (4 fl. oz.) of this sodium hypochlorite solution for each 4000 gallons of water will provide 1.0 ppm available chlorine by weight. Frequency of additions to maintain 0.8 to 1.0 ppm available chlorine will depend on temperature and number of swimmers. Test water frequently to maintain the pH and chlorine residual in the proper range.

**DIRECTIONS FOR DISINFECTION OF POTABLE WATER
FOR HOME WELL WATER SYSTEMS**

Use this sodium hypochlorite solution in the ratio of one part sodium hypochlorite solution to 100 parts softened water. Mix sodium hypochlorite solution and water thoroughly and feed solution with a hypochlorinator (metering pump). Maintain a free available chlorine residual of at least 0.2 ppm and no more than 0.6 ppm throughout the distribution system, as determined by a DPD Chlorine test kit. Bacteriological sampling must be conducted at a frequency no less than that prescribed by the National Sanitation Primary Drinking Water Regulations. Check water frequently with a DPD Chlorine test kit.

For further information, contact your local health department for further details.

**DIRECTIONS FOR SANITIZING FOOD PROCESSING
OR DAIRY EQUIPMENT**

Use this sodium hypochlorite solution in the ratio of one part sodium hypochlorite solution to 100 parts water. Apply solution to surfaces through a spray nozzle. Allow solution to remain on surfaces for a minimum of 10 minutes. Do not rinse with water. Rinse with clean water. Do not use sodium hypochlorite solution for food contact surfaces. Additional information is available on the product label. For more information, contact your local health department for further details.

STORAGE AND DISPOSAL: Store in a cool, dry area away from direct sunlight. In case of spill, flood area with large quantities of water. Rinse thoroughly with water and return to manufacturer or distributor. Do not flush down drain. Do not use in an approved landfill. Product or rinsate that cannot be recycled should be disposed of with other hazardous waste. Do not use in a sanitary sewer. Do not use in a water treatment plant.
