Directions for Use

GENERAL CLASSIFICATION

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

CALCLEAN ONE STEP DC is a proven "one-step" cleaner-disinfectant-sanitizer-fungicide-virucide in the presence of moderate amounts of organic soil.

Apply CALCLEAN ONE STEP DC to walls, floors and other hard (inanimate) non-porous surfaces such as tables, chairs, countertops, sinks and bedframes with a cloth, mop or mechanical spray device so as to thoroughly wet surfaces. For heavily soiled areas, a preliminary cleaning is required. Prepare a fresh solution daily or when used solution becomes visibly dirty.

Disinfection—to disinfect hard, non-porous surfaces, add 2.5 oz. per gallon of water. Treated surfaces must remain wet for 10 minutes. At this use-level, CALCLEAN ONE STEP DC is also virucidal and fungicidal.

Sanitizing—to sanitize porous and non-porous non-food contact surfaces, add 0.5 oz. per gallon of water. Treated surfaces must remain wet for 60 seconds.

2.5 oz. per gallon use-level
The broad spectrum activity of CALCLEAN ONE STEP DC has been evaluated in the presence of 5% serum and found to be effective against the following organisms by the ADAC Use-Dilution test.

<i>Pseudomonas aeruginosa</i>	<i>Klebsiella pneumoniae</i>
<i>Staphylococcus aureus</i>	<i>Enterobacter aerogenes</i>
<i>Salmonella choleraesuis</i>	<i>Salmonella schottmulleri</i>
<i>Escherichia coli</i>	<i>Streptococcus faecalis</i>
<i>Streptococcus pyogenes</i>	<i>Shigella dysenteriae</i>
<i>Proteus mirabilis</i>	<i>Brevibacterium ammoniagenes</i>

ADAC Fungicidal Test
CALCLEAN ONE STEP DC is an effective fungicide against *Trichophyton mentagrophytes* (the athlete's foot fungus) when used on surfaces in areas such as locker rooms, dressing rooms, shower and bath areas, exercise facilities, etc.

Virucidal Performance
At 2 oz. per gallon use-level, CALCLEAN ONE STEP DC was evaluated in the presence of 10% serum and found to be effective against the following viruses. Herpes Simplex (a member of the virus family that causes infectious mononucleosis), Vaccinia (representative of the pox viruses), Adenovirus Type 5 (a causative virus in respiratory diseases) and Influenza A, as represented by the strains commonly called the Hong Kong Flu and the London Flu Virus, on inanimate environmental surfaces.

Sanitizing Non-Food Contact Surfaces (such as floors, walls, tables, etc.)
At 0.5 oz. per gallon use-level, CALCLEAN ONE STEP DC is an effective sanitizer in waters of up to 1000 ppm hardness against *Staphylococcus aureus* and *Klebsiella pneumoniae* in the presence of 5% serum on hard porous and non-porous environmental surfaces.

Cross-contamination is of major housekeeping concern not only in hospitals, but in schools, institutions, and industry. CALCLEAN ONE STEP DC is formulated for this problem area. It both cleans and disinfects effectively and is virucidal when used as directed. Its hard surface disinfecting action will reduce the hazard of cross-contamination.
