WASPS: Application should be made in late evening when insects are at rest. Spray liberally into hiding and breeding places, contacting as many insects as possible. Repeat as necessary. Spray directly on stray wasps that enter buildings.

TO KILL CRAWLING INSECTS

ROACHES, EARWIGS, SOW BUGS, SPIDERS: Spray hiding places such as baseboards and floor boards, moist places, openings around sinks, drains and pipes, behind bookcases, cabinets, and other storage areas, hitting as many insects as possible.

ANTS: Spray trails, nests, around windows and sills and openings around pipes and baseboards where ants crawl, hitting as many as possible.
