Subject: Label Notification(s) for Pesticide Registration
Notice 98-10

Dear Mr. Whitney:

The Agency is in receipt of your Application for Pesticide
Notification under Pesticide Registration Notice PRN 98-10 dated
September 20, 2011 for:

Revenge Insect Killer

EPA Reg. No. 44446-64

The Registration Division (RD) has conducted a review of this
request for applicability under PRN 98-10 and finds that the label
change(s) requested falls within the scope of PRN 98-10. The
label has been date-stamped "Notification" and will be placed in
our records.

If you have any questions, please contact Linda A. DeLuise at
703-305-5428.

Sincerely,

A handwritten signature in cursive script, appearing to read "Linda A. DeLuise".

Richard J. Gebken
Product Manager
Insecticide Branch
Registration Division (7504P)

NOTIFICATION

PRECAUTIONARY STATEMENTS
 Hazards To Humans & Domestic Animals
CAUTION: Avoid contact with skin or clothing. Wash thoroughly with soap and water after handling.

Environmental Hazards
 This product is toxic to fish. Do not apply directly to water. This product is extremely toxic to fish and other aquatic organisms. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticides of the treatment area. Rinsing application equipment over the treated area will help avoid runoff to water bodies or drainage systems.

FIRST AID

If inhaled:	<ul style="list-style-type: none"> Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.
If on skin or clothing:	<ul style="list-style-type: none"> Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
If in eyes:	<ul style="list-style-type: none"> Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
If swallowed:	<ul style="list-style-type: none"> Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

PHYSICAL OR CHEMICAL HAZARDS
 Contents under pressure. Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting. Do not use this product in or on electrical equipment due to the possibility of shock hazard.

DIRECTIONS FOR USE
 It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do not use in food/feed areas of food processing establishments, restaurants or other areas where food/feed is commercially prepared or processed. Do not use in serving areas while food is exposed or facility is in operation. Serving areas are areas where prepared foods are served such as dining rooms but excluding areas where food may be prepared or held. In the home, cover all food processing surfaces, such as garbage rooms, lavatories, floor drains (to wash before use. Cover or remove exposed food.

This product may be used as a crack and crevice treatment or as a spot application in non-food/feed areas. All areas where insects hide or through which insects may enter should be treated. For use in non-food/feed areas such as garbage rooms, lavatories, floor drains (to sewers), offices, boiler rooms, machine rooms, boiler rooms, garages, mop closets and storage (after canning or bottling).

Do not use in Federally inspected meat and poultry plants.

Do not apply this product in occupied patient rooms or in any room/areas while occupied by patients, the elderly or infirm. Do not apply to classrooms when in use.

Do not water the treated area to the point of run off.

Do not make applications during rain.

All outdoor applications must be limited to spot or crack-and-crevice treatments only, except for the following permitted uses:

- (1) Treatment to soil or vegetation around structures.
- (2) Applications to building foundations, up to a maximum height of 3 feet.

Other than applications to building foundations, all outdoor applications to impervious surfaces such as sidewalks, driveways, patios, porches and structural surfaces (such as windows, doors, and eaves) are limited to spot and crack-and-crevice applications, only.

Application is prohibited directly into sewers or drains, or to any area like a gutter where drainage is prevented, storm drains, water bodies, or aquatic habitat can occur. Do not allow product to enter any drain during or after application.

General Information: This product provides effective control of pests in and on buildings and structures and their immediate surroundings and on modes of transport. Permitted areas of use include: apartment buildings, homes, hotels, hospitals, nursing homes, schools, industrial buildings, laboratories, museums, private residences, utilities and the non-cooled areas of food/feed handling establishments, and on: vessels, railcars, aircraft (cargo areas only), buses, trucks and trailers.

Surface Spray Application: Remove protective cap. Hold container upright with nozzle away from you. Press valve down and spray as directed. Spray surface until slightly wet (at a rate of 4 ounces product to treat approximately 25 square feet of surface area).

REVENGE

Insect Killer

Recommended for Household and Commercial/Industrial

- Use in Non-Food/Feed Areas
- Contains Synergized Permethrin and Tetramethrin
- Provides Quick Killing Action and Residual Control
 - Economical Do-It-Yourself Pest Control
- Use Indoors and Outdoors • Kills Fire Ants - Fleas - Roaches - Ants
 - Kills on Contact - Kills Fast • Kills Hidden Bugs
 - Kills Bugs You See and Even the Ones You Don't
- A broad spectrum insecticide highly effective against Ants, Carpenter Bees, Carpenter Ants, Carpet Beetles, Centipedes, Cockroaches, Crickets, Earwigs, Firebrats, Fleas, Flour Beetles, Grain Beetles, Ground Beetles, Millipedes, Mole Crickets, Moths, Pillbugs, Scorpions, Silverfish, Sowbugs, Spiders, Termites, Ticks and many other similar crawling insects
 - Water-Based Formula, Non-Staining
 - No Oily Residues; No Unpleasant Odor • Protects for up to 4 weeks [Kills Fire Ants in Their Mounds] (Denotes Alternate Text)

The purpose of such applications of this product for termites is to kill workers or winged reproductive forms which may be present in the treated channels at the time of treatment. Such applications are not a substitute for mechanical alteration, soil treatment or foundation treatment but are merely a supplement. For active termite infestations, get a professional inspection.

ACTIVE INGREDIENTS:

Tetramethrin	0.150%
Permethrin	0.375%
Piperonyl Butoxide Technical	0.750%
TOTAL	98.725%
1-cyano-2,2-dimethyl-3-(2-methylpropyl) cyclopropane-carboxylate	100.000%
(D-phenoxypenyl methyl (+)-cis/trans 3-(2,2-dichloroethyl) 2,2-dimethylcyclopropane-carboxylate, C ₂₅ H ₃₅ N ₃ O ₂ ; min. 45% (+/-) cis and max. 55% (+/-) trans.	
Equivalent to min. 0.60% (butoxycarbonyl(5-propylpiperonyl) ether and 0.15% related compounds.

Crack & Crevice Injection: Remove protective cap, hold container upright and attach injection tube for injecting into cracks and crevices where insects may be hiding. Using and breathing. Place injection tube 1/2 inch into cracks, crevices, holes and other small openings where insects may be a problem. Release a one-second spray per spot. In severe infestations, if possible, place spots approximately three feet apart. In long running cracks, move the injector tip along the crack while spraying. Move at the rate of 12 inches apart. In light infestations or for preventative treatment, place spots approximately three feet apart. In long running cracks, move the injector tip along the crack while spraying. Move at the rate of one linear foot per second in heavy infestations and three feet per second in light infestations. See the additional directions below for effective control of specified insects.

INDOORS: Cockroaches (including adult and immature stages of both brown banded and german cockroach) and carpenter ants (including all life stages). Ants, Booklice, Boxelder Bugs, Centipedes, Crickets, Dermaptans, Firebrats, Fleas, German Beetles, Silverfish, Sowbugs, Ticks and Waterbugs. Spray into hiding places such as cracks and crevices, behind sinks, cabinets, along baseboards and floors, around drains and plumbing, hitting insects with spray whenever possible. Repeat every 4 weeks.

Ants: Spray freely around ant trails, doors and windows and other places where ants enter premises around nests hidden under steps, brickwork, concrete, etc. Break apart accessible nests and spray freely on and around debris. Repeat every 4 weeks.

Carpenter Ants: For effective control, locate and treat nests and surrounding areas. Apply around doors and windows and other places where ants enter premises and where their crawl and hide. Inject into wall voids and infested wood through existing openings or newly drilled small holes.

Brown Dog Ticks and Fleas in Buildings: Apply to infested areas such as pet beds and resting quarters, nearby cracks and crevices, under the edges of rugs and floor coverings, between and under cushions of upholstered furniture and other areas where these pests may be present. Remove old bedding of pets and replace with clean fresh bedding after treatment of pet areas. Do not use directly on pets.

Spiders: Apply along and behind baseboards, to window and door frames, corners, pipes, storage facilities, attics, crawl spaces and other areas over which these pests may crawl.

Centipedes, Earwigs, Ground Beetles, Millipedes, Mole Crickets, Pillbugs, Sowbugs, Scorpions and Ticks: Apply around doors and windows and other places where these pests may enter premises. Treat baseboards, storage areas and other locations where these pests are found.

Pantry Pests - Grain Beetles (Rust, Merchant and Sawtoothed), Flour Beetles (Red and Confused), Rice Weevils, Lesser Grain Weevils, Spotted Beetles and Tobacco Moths: Treat exposed stages. Remove all foodstuffs, utensils and shell paper from area to be treated. Discard used shell paper and any infested foodstuffs. Apply spray to shelves and in cracks and crevices behind and under cupboards and cabinets, around processing and handling equipment, around canisters or containers or other areas where these insects tend to congregate. Allow spray to dry prior to replacement of food and utensils. Dispose of infested stored food products in the home.

Carpenter Beetles (Black, Furniture and Varied): Spray on and under edges of floor coverings, under rugs and furniture and in closets or other localities where these insects are found. Repeat every 4 weeks.

Webbing Clothes Moths: Use this product as a crack and crevice treatment in closets and other storage areas where these pests are found. This is an adjunct treatment and will not control moth larvae already on clothes. Do not apply to clothing.

OUTDOORS: Ants, Cockroaches, Crickets, Centipedes, and Silverfish. Spray infested surface of patio or picnic areas, hitting as many insects as possible. Also spray legs of tables and chairs to repel ants. Spray an hills for tick control.

Fire Ants: To treat mounds, use soil injector. To maximize spray distribution, insert injector into the mound full length if possible. Inject the mound at 5-6 sites at a rate of 5-10 seconds spray per site. For very large mounds (over 38 inches in diameter), increase the number of injection sites. Space injection sites in a circular pattern on the mound surface with one site in the center. To quiet active ants on mound surface, sweep surface with spray from a distance of 18 inches. For best results, apply in cool weather or in early morning or late evening hours. Treat new mounds as they appear.

Pests on Outside Surfaces Of Buildings: For control of building infestation due to Ants, Clover Mites, Crickets, Earwigs, Millipedes and Sowbugs (Pillbugs). Spray foundation of building where insects are active and may find entrance up to a height of 2 to 3 feet. Apply as a residual spray to outside surfaces of buildings where insects tend to congregate. Spray areas include (but are not limited to) screens, window frames, eaves, porches, patios, garage and refuse dumps. Repeat every 4 weeks.

Localized Treatment of Wood-Infesting Insects: Beetles and Borers (such as the following): Lamellae, Anobiidae, Boreidae, Buprestidae, Cerambycidae, Lyctidae, Cuculicidae, Scolytidae, Carpenidae, Curculionidae and Wood Boring Weevils. Locate area of infestation and/or insect larvae and cavities. Using a crack & crevice tip, spray into tunnels, galleries and inaccessible close voids. In treated areas, small holes should be drilled right to insure thorough insecticide gallery treatment. Be sure not to contact electrical wiring or plumbing when treating. For Carpenter Bees, seal the entrance holes with small pieces of stainless steel wool after application.

NOTICE: Buyer assumes all responsibility for safety and use not in accordance with directions.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.
STORAGE: Store in original container. Store in cool dry area away from children.
DISPOSAL: Do not pour contents into water, soil, or other open water. Do not use for anything other than intended use. Call your local solid waste agency or 1-800-CLEANUP for disposal instructions.
INGREDIENTS (CAS#): Water (7732-18-5), Propylene Glycol (6474-85-8), Permethrin (62645-53-1), 1-cyano-2,2-dimethyl-3-(2-methylpropyl) cyclopropane-carboxylate (6474-85-8).
