

# AB-7714 Microbicide

**ACTIVE INGREDIENT:**

Potassium dimethylidithiocarbamate ..... 26.0%

**INERT INGREDIENTS** ..... 75.0%

This product contains 2.3 lb. of active ingredient per gallon and weighs 8.26 lb. per gallon.

**KEEP OUT OF REACH OF CHILDREN  
WARNING****PRECAUTIONARY STATEMENTS  
HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**WARNING:** Causes eye damage and skin irritation. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Avoid contamination of food. Wear goggles or face shield and rubber gloves when handling. Wash thoroughly after handling.

**STATEMENT OF PRACTICAL TREATMENT:** In case of skin contact, wash with plenty of soap and water. Remove contaminated clothing and wash before reuse. If product gets in the eyes, flush immediately with copious amounts of clean, cool water for at least 15 minutes. Get medical attention immediately. If product is swallowed, call a physician immediately. If patient is conscious, induce vomiting by stroking or tickling the patient's throat or lie back on patient's tongue. Emetics such as 2 teaspoonsful (10 ml.) of ipecac syrup or 1 teaspoonful (5 ml.) of dry mustard in warm water to form a paste or even soap in warm water can be used. Repeat until vomit fluid is clear. Then have patient drink plenty of milk, gelatin solution, beaten egg whites, flour and water, or other normally digestible food. Never induce vomiting or give anything by mouth to an unconscious person.

Note to physician: Probable mucosal damage may contraindicate gastric lavage.

**ENVIRONMENTAL HAZARDS:** The pesticide is toxic to fish. Do not discharge treated effluent into lakes, streams, ponds, or public waters unless in accordance with a NPDES permit. For guidance, contact your Regional Office of the Environmental Protection Agency.

ACCEPTED  
with COMMENTS  
to EPA Letter Dated:

OCT 18 1982

Under the Federal Insecticide, Fungicide, and Rodenticide Act, Hydrotrek, Inc., as amended, for the pesticide registered under EPA Reg. No. R.O. Box 34040 Houston, TX 77234  
EPA REG. NO. 44611-2 EPA EST. NO. \_\_\_\_\_

NET CONTENTS: \_\_\_\_\_

**DIRECTIONS FOR USE  
GENERAL CLASSIFICATION**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

AB-7714 Microbicide is used in industrial and/or commercial recirculating cooling tower systems and industrial air-washing systems to control microbiological slime. Prior to the use of AB-7714 Microbicide in industrial and/or commercial recirculating cooling tower systems, systems should be cleaned to remove algal growth, microbiological slime, and other deposits. Then make an initial slug addition of 4.5 to 6.8 fl. oz. of AB-7714 Microbicide per 1000 gal. of water to provide 40 to 60 ppm of AB-7714 Microbicide, based on total weight of water in the system. Repeat initial dosage until control is evident. Make subsequent slug addition of 2.3 to 6.8 fl. oz. of AB-7714 Microbicide per 1000 gal. of water (20 to 60 ppm AB-7714 Microbicide) every 2 to 5 days or as needed. The frequency of addition depends upon the relative amount of bleedoff and the severity of the microbiological problem. Slug additions should be made in the sump of recirculating cooling tower systems.

AB-7714 Microbicide is used in industrial air-washing systems which maintain effective mist eliminating components. Prior to its use, systems should be cleaned to remove bacterial slime and other deposits. An initial slug dose of 10.6 to 13.6 fl. oz. of AB-7714 Microbicide per 1000 gal. of water is recommended. Repeat initial dosage until control is evident. Subsequent slug additions of 7.8 to 13.6 fl. oz. of AB-7714 Microbicide per 1000 gallons of water should be employed every 1 to 5 days, or as needed. The frequency of addition depends upon the relative amount of bleedoff and severity of the bacterial problem. Slug additions may be made to the sump or the water collection trays of the airwash system.

AB-7714 Microbicide is used to control both aerobic and anaerobic bacteria, including sulfate-reducing organisms, in petroleum secondary recovery waterflooding operations. In systems fouled with microbiological deposits, AB-7714 Microbicide should be added as a slug dose to provide a concentration of 16 to 32 ppm (1.9 to 3.8 fl. oz. of AB-7714 Microbicide per 1000 gal. of water treated). This should be followed by a continuous addition of AB-7714 Microbicide employing a chemical-metering pump to maintain a concentration of 16 ppm, based on total weight of water treated. Both slug additions and continuous addition of AB-7714 Microbicide should be made at the heater-treater dump, gathering lines, or receiving tanks. Addition should always be made upstream to the filter.

AB-7714 Microbicide is also used to inhibit the growth of fungi and bacteria in water-based drilling muds, completion fluids, packer fluids, and other water-based drilling fluids containing starch, gums, sugars, or other organic materials. For these purposes AB-7714 Microbicide is added at rates of 1.4 to 6.8 gal. per 100 barrels of fluid (0.03 to 0.18% by volume).

**STORAGE AND DISPOSAL**

**PROHIBITIONS:** Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited.

**PESTICIDE DISPOSAL:** Pesticide, spray mixture, or waste that cannot be used or chemically repurposed should be disposed of in a landfill approved for pesticides, or buried in a safe place away from water supplies.

**CONTAINER DISPOSAL:**

(1) **METAL:** Triple rinse (or equivalent) and offer for recycling, reconditioning, or disposal in an approved landfill or bury in a safe place. Containers over 30 gallons should be rinsed before offering for reconditioning.

(2) **PLASTIC:** Containers under 30 gallons must not be rinsed but should be triple rinsed and disposed of in an incinerator or landfill approved for pesticide containers or buried in a safe place. Containers over 30 gallons are to be rinsed and offered for reconditioning or triple rinsed (or equivalent) and offered for recycling, reconditioning, or disposal in an approved landfill or buried in a safe place.

**GENERAL:** Consult Federal, State, or local disposal authorities for approved alternative procedures.
