

\*\* will control algae and bacterial slimes found in recirculating cooling tower waters, oil field water flood and crude oil pipelines and storage facilities

\*\* helps clean and loosen some debris from cooling and flooding system surfaces. When used in slug doses, no other microbiocide is required

\*\* is economical to use because it is concentrated. It should be handled with care

#### Precautionary Statements

#### Hazards to Humans and domestic animals

### DANGER:

Keep Out of Reach of Children. Corrosive. Causes severe eye and skin damage. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling. Harmful or fatal if swallowed. Avoid contamination of food.

#### ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not apply in marine and/or estuarine oil fields. Do not discharge treated effluent into lakes, streams, ponds, or public waters unless in accordance with a NPDES permit. For guidance contact your Regional Office of the Environmental Protection Agency.

#### PHYSICAL HAZARDS

DO NOT USE, POUR, SPILL OR STORE NEAR HEAT OR OPEN FLAME.

#### STORAGE AND DISPOSAL

- DO NOT CONTAMINATE WATER, FOOD, OR FEED BY STORAGE OR DISPOSAL.
- OPEN DUMPING IS PROHIBITED
- DO NOT REUSE EMPTY CONTAINER

#### PESTICIDE DISPOSAL

PESTICIDE THAT CANNOT BE USED, OR CHEMICALLY REPROCESSED SHOULD BE DISPOSED OF IN A LANDFILL APPROVED FOR PESTICIDES OR BURIED IN A SAFE PLACE AWAY FROM WATER SUPPLIES

#### CONTAINER DISPOSAL

DISPOSE OF IN AN INCINERATOR OR LANDFILL APPROVED FOR PESTICIDE CONTAINERS. BURY IN A SAFE PLACE OR RETURN TO DRUM RECONDITIONER

#### GENERAL

CONSULT FEDERAL, STATE OR LOCAL DISPOSAL AUTHORITIES FOR APPROVED ALTERNATIVE PROCEDURES

After approval by the EPA, label will be reset completely and product name will appear in appropriate spaces. (Those designated with \*\*)

## HPI 7910

Water Treatment Microbiocide  
for the effective control of a broad  
spectrum of microorganisms in building and  
industrial recirculating cooling towers, oil field  
flood or salt water disposal systems and  
crude oil pipelines and storage facilities

#### Active Ingredient

1-Hydroxyethyl-1-benzyl-2-alkyl  
imidazolium chloride 50%

#### Inert Ingredients

50%

100%

\*Alkyl as in fatty acids of coconut oil

KEEP OUT OF REACH OF CHILDREN

### DANGER

#### Statement of Practical Treatment

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse.

If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution, or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

**NOTE TO PHYSICIAN:** Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression, and convulsion may be needed.

#### DIRECTIONS FOR USE GENERAL CLASSIFICATION

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling

For the control of algae and bacterial slimes found in recirculating cooling tower waters, oil field water flood and crude oil pipelines and storage facilities. When used in slug doses, no other microbiocide is required. The frequency of application and the recommended dosages may differ in many factors. To control algae and bacterial slimes, follow this procedure:

##### Recirculating Cooling Towers

1. Apply 7 fluid ounces per 1000 gallons of water to be treated (25 ppm active ingredient).  
Should the above dosage not give satisfactory results, use 13 fluid ounces per 1000 gallons of water.  
Repeat the initial dose every seven days or increase the frequency if needed.
2. When the above treatment level is successful, use 3 to 4 fluid ounces per 1000 gallons of water to maximize efficiency.  
Repeat weekly as needed.  
Should the above dosage again go back to initial dosage.

Recirculating cooling tower waters that are inherently low in algae growth and bacteria count may be adequately controlled by the lower range of these dosages. Slug feed every seven days.

Dilute the appropriate amount of \*\* in 1 or 2 gallons of water, then add to the sump of the tower. Note this product weighs 7.76 lbs. per gallon (at 20°C).

Should tower be heavily fouled, a pre-cleaning is required.

##### Oil Field Water Flood or Salt Water Disposal Systems (Do not apply in Marine and Estuarine Oil Fields)

1. For the control of slime forming and sulfate reducing bacteria in oil field water flood or salt water disposal systems, add 35-50 ppm (active) \*\* (9% = 13 gallons per 3000 barrels of water) continuously. Levels for effective control will vary depending on conditions at the site.
2. For intermittent use, dose at a rate of 35-70 ppm (active) \*\* (9% = 18 gallons per 3000 barrels of water) for 4-8 hours per day, one to four times a week as needed to maintain control.

##### Crude Oil Pipeline and Storage Facilities

1. For the control of sulfate reducing bacteria, heterotrophic bacteria and corrosion in crude oil pipelines, slug doses with 0.5-3 gallons of \*\* per diameter inch per mile of pipeline. Apply the appropriate dosage in slug form in front of the pipeline pig as required by the system.
2. For continuous pipeline feed applications, add 9.5-13 gals of \*\* per 3000 barrels of crude oil. \*\* is added to the pipeline directly behind the pig.
3. For the treatment of crude oil storage facilities, add \*\* at the rate of 9.5-13 gallons per 3000 barrels of crude oil. Add \*\* directly from the drums with the proper type of metering equipment. This product weighs 7.76 lbs/gallon (at 20°C). Since crude oil pipeline and storage facilities differ in the material handled and operation, the recommended dosages may require adjustment based on practical experience.
