NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with Title section 5(c)(2) of the Act that you:

1. Submit the data required for registration/reregistration of your product under Title section 5(c)(2) when the Agency requires and registers a similar product to submit such data.

2. Make no labeling changes to the label before you release the product for shipment.

a. The label must read "EPA registration no. 44616-14."

b. The label must include the following statement reading:

"Do not use in or near streams or ponds. Do not contaminate water by disposal of product or disposal of wastes" to "Do not apply directly to water. Do not contaminate water with spray or equipment washwater."

c. The label must include the following:

"Do not spray or apply directly to water. Do not use with approved respiratory protection."

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Dilutions of this concentrate should be made shortly before use in the quantity needed for the individual application. Water dilutions should not be kept for future use.

To Control Insects On Animals

Sponge Bath or Dip: Dilute this concentrate at a rate of 1 fluid ounce in 23 fluid ounces of water (2 tablespoons of concentrate in 2-3/4 cups of water) or 6 fluid ounces (12 tablespoons in 1 gallon of water.

Unit Size: 4oz; 8oz; pint; quart & gallon.

For control of ticks, fleas and lice on cats and dogs, sponge solution on thoroughly wetting skin over entire animal or dip the animal. Do not rinse; allow solution to remain on animal. In cases of heavy tick infestations on long-haired cats or dogs, dilute 1 fluid ounce of concentrate to 11 fluid ounces with water (2 tablespoons of concentrate in 1 1/4 cups water) or 12 fluid ounces (24 tablespoons) of concentrate in one gallon of water.

Mist Spray: Dilute this concentrate at the rate of 7 fluid ounces in 1 gallon of water or 1 fluid ounce of concentrate in 18 fluid ounces of water.

For control of ticks, fleas and lice using a mist spray. To insure thorough coverage, part the fur by stroking against the lay of the hair as spray is applied. Spray ticks directly. Apply to moisten the fur lightly.

To control spinose ear ticks and ear mites, syringe the ears with a few drops of this dilution so that it can penetrate the wax down to the surrounding tissues. Repeat treatment once or twice at 2 to 3 day intervals as necessary. For temporary protection from mosquitoes, eye gnats, biting flies and chiggers, apply to cover the surface of the hair. Repeat treatment as necessary when insects are troublesome.

Ticks are only an occasional pest of cats. This product will control ticks on cats should they occur.

To Control Insects in Kennels and Animal Quarters

Dilute at the rate of 13 fluid ounces in 1 gallon of water or 2 fluid ounces in 18 fluid ounces of water. Remove pets before treating area and ventilate thoroughly before allowing them to re-enter treated area.

For cleanout of fleas and ticks in kennels, apply this dilution in a good machine adjusted to deliver coarse droplets. Apply to the point of runoff with special attention to cracks and crevices and other insect hiding places. Bedding should be removed and sprayed thoroughly.

To control flies, mosquitoes and gnats in kennels, apply this dilution in a good sprayer adjusted to deliver a fine mist. Use at the rate of approximately 1 ounce for 1000 cubic feet of space. Fill the enclosed area with mist wherever practical. Keep doors and windows closed for 10 minutes or more after application. Remove pets before treatment and do not allow them to return until area is completely ventilated. Do not remain in treated areas and ventilate after treatment is completed.

Do not reuse or wrap container and discard in
