44638-2

DATE OF ISSUANCE

15 JUN 1987

TERM OF ISSUANCE

NAME OF PESTICIDE PRODUCT

IODOCIDIN

NOTICE OF PESTICIDE:  REGISTRATION  
 REREГИSTRATION

(Under the Federal Insecticide, Fungicide,  
and Rodenticide Act, as amended)

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

Clive Craig Company  
3894 Regent Street  
Los Angeles, Ca 90034

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

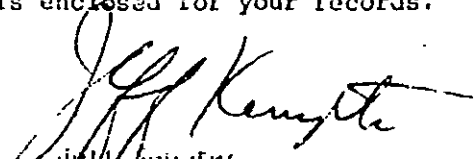

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA section 3(c)(7)(A) provided that you:

1. submit/cite all data required for registration/reregistration of your product under FIFRA section 3(c)(5) when the Agency requires all registrants of similar products to submit such data.
2. Add the phrase "EPA Registration No. 44638-2" to your label before you release the product for shipment.
3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

# IODOCIDE

FOR ~~SANITIZING, DISINFECTING,~~ AND  
DISINFECTING

## ACTIVE INGREDIENT

Nonylphenoxyethoxyethanol -  
Iodine complex .....23.75%  
INERT INGREDIENTS.....76.25%  
(provides 1.75% titratable iodine)

## DANGER!

Keep out of reach of children. See first aid and other instructions on back panel.

Clive Craig Company  
8894 Regent Street  
Los Angeles, Ca 90034

Reg No. 44638-E  
EPA Est No. 44638-CA-01

Net Contents: 4 ounces

## USES

Iodocide is a one step cleaner disinfectant containing iodine, a broad spectrum germicide non-selective in action, complexed with nonionic surfactants.

It is recommended for general use in dental, medical, and hospital environments.

Iodocide (at 150 ppm iodine) is effective for solid surfaces as a one step cleaner disinfectant against bacteria, pathogenic fungi, and viruses. Iodocide's range of effectiveness also includes, but is not limited to, Influenza A<sup>1</sup> (Hong Kong) virus, Herpes Simplex virus, Pseudomonas uginosa, Staphylococcus Aureus, and Salmonella Choleraesuis. Iodocide is tuberculocidal. Iodocide may also be used for disinfecting surgical equipment (at 100 ppm iodine).

Iodocide is not adversely affected by hard water or low water temperatures.

Iodocide's brown to amber color of use dilution is its own indicator of germicidal activity. Diluted solutions may be utilized until such time as the original color of the solution has faded to an appreciable extent. Noticeable fading of color is the signal to dispose of the diluted solution.

## USE DIRECTIONS

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

## CLEANING AND DISINFECTING IN DENTAL, MEDICAL, AND HOSPITAL ENVIRONMENTS

For use in operatories, on equipment, and similar hard surfaces.

For disinfecting and cleaning in one operation, use 10 ml of Iodocide per 1 liter of water (150 ppm iodine). Apply with a suitable applicator such as sponge or gauze 2 by 2 so as to wet the surface thoroughly for a minimum of 10 minutes. For extra dirty surfaces, remove excess matter first, then proceed as above. ~~Rinse with potable water.~~

For disinfecting surgical equipment, thermometers, rubber products, or glassware articles should be thoroughly cleaned of all blood, serous and other soils. Dilute 7 ml of Iodocide per 1 liter water (100 ppm iodine) and allow to soak a minimum of 10 minutes. ~~Rinse with potable water.~~

## DANGER!

### HAZARD to HUMANS and DOMESTIC ANIMALS

Corrosive. Causes eye damage. Protect eyes when handling. Do not get in eyes or on clothing. Avoid skin contact. Harmful if swallowed. Avoid contamination of food.

### FIRST AID:

In case of contact with eyes, flush immediately with plenty of water for at least 15 minutes. Call a physician.

For skin, wash promptly. Remove and wash any contaminated clothing before reuse. If swallowed, drink promptly a large quantity of milk, egg white, or gelatin solution. If these are not available, drink large quantities of water. Avoid alcohol. Call a physician.

### CONTAINER DISPOSAL

Rinse empty container thoroughly with water and discard in trash collection.
