STATEMENT OF PRACTICAL TREATMENT

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse.

If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution; or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

Note To Physician: Probably mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression, and convulsion may be needed.

DIRECTIONS FOR USE GENERAL CLASSIFICATION

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Sanitizing of Food Processing Equipment and Other Food Contact Surfaces: For sanitizing food processing equipment, dairy equipment, food utensils, dishes, silverware, glasses, linens, countertops, refrigerated storage and display equipment and other hard non-porous surfaces. No potable water line is required.

Wash and rinse all articles thoroughly. Then apply a solution of 1 oz. Sani-San per 8 gallons of water (125 ppm active chlorine). Surfaces should remain wet for at least one minute to insure the adequate draining and drying. If the solution is not the proper strength, or when a solution becomes soiled, it is ineffective and application of the solution may have to be repeated for sanitizing application.

Apply to the food processing equipment and other food contact surfaces. The solution should be applied by spraying, brushing, or pouring. Do not allow the solution to dry on the surface.

For the use of Sani-San on food contact surfaces, the solution should be applied by spraying, brushing, or pouring. Do not allow the solution to dry on the surface.

Apply to the food processing equipment and other food contact surfaces. The solution should be applied by spraying, brushing, or pouring. Do not allow the solution to dry on the surface.

U.S. Public Health Service - Food Service Sanitation Recommendations

Cleaning and Sanitizing

Food contact surfaces should be cleaned and sanitized throughout the day. The schedule should be based on the type of food and amount of food particle accumulation.

Regular, effective cleaning and sanitizing of equipment, utensils, and work or dining surfaces minimize the probability of contaminating food during preparation, storage or service, and the transmission of disease organisms to consumers and employees. Effective cleaning will remove soil and prevent the accumulation of food residues which may decompose or support the rapid development of food poisoning organisms or toxins. Application of effective sanitizing procedures destroys those disease organisms which may be present on equipment and utensils after cleaning, and prevents the transfer of such organisms to consumers or employees, either directly through tableware such as glasses, cups and flatware or indirectly through the food.

To prevent cross contamination, benches and food contact surfaces of equipment shall be washed, rinsed, and sanitized after each use and following any interruption of operation during which time contamination may have occurred.

Where equipment and utensils are used for the preparation of foods on a continuous or production line basis, utensils and the food contact surfaces of equipment shall be washed, rinsed, and sanitized at intervals throughout the day. The schedule should be based on the type of food and amount of food particle accumulation.

- 3) Sanitize equipment and utensils by immersion in a 1 oz. 4 gallon solution of Sani-San (125 ppm active chlorine) for at least 60 seconds at a temperature of 75°F. This solution is equivalent to a solution containing 50 ppm available chlorine.
- 4) Allow sanitized surfaces to drain and air dry.
- 5) Sani-San meets the requirements of 21 CFR 178.1010.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS DANGER

Keep out of reach of children. Corrosive. Causes eye damage and skin irritation. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling. Wash thoroughly with soap and water. Do not breathe spray mist. Avoid contact with food.

Storage And Disposal

Store in a cool, dry place. Do not store in a container that has been used for food. Do not store in a container that has been used for food.

First Aid Measures

In case of eye contact, flush with water for at least 15 minutes. In case of skin contact, wash with soap and water. In case of ingestion, do not induce vomiting. Seek medical attention.

Prevention Measures

Use proper ventilation. Do not breathe spray mist. Wear proper protective clothing and equipment.

Labels

Labels should be placed on all containers of Sani-San.
