#1119 Microbiocide

DIRECTIONS FOR USE GENERAL CLASSIFICATION

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

#1119 Microbiocide is used to control algae and bacteria in commercial and industrial water cooling towers. Prior to its use, towers should be cleaned to remove algal growth, microbiological slime, and other debris. An initial slug addition of 5.1 to 10.2 fluid ounces of #1119 Microbiocide per 1000 gallons of water is recommended. Repeat initial dosage until control is achieved.

Subsequent slug additions of 1.7 to 10.2 fluid ounces of #1119 Microbiocide per 1000 gallons of water should be employed every 1 to 5 days. The frequency of addition depends upon the relative amount of debris and the severity of the microbiological problem. Slug additions should be made to the sump of water cooling towers.

STORAGE AND DISPOSAL

PROHIBITIONS: Do not contaminate water, food, or feed. Open dumping is prohibited.

PESTICIDE DISPOSAL: Pesticide, spray mixture, or residue used or chemically reprocessed should be disposed of in a landfill for pesticides, or buried in a safe place away from water supply.

CONTAINER DISPOSAL:
METAL: Triple rinse (or equivalent) and offer for recycling or disposal in an approved landfill or bury in a safe place. Containers under 30 gallons should be resealed before offering for reconditioning.
PLASTIC: Containers under 30 gallons must not be reused. Containers over 30 gallons should be triple rinsed and disposed of in an incinerator or landfill approved for pesticides or buried in a safe place. Containers over 30 gallons should be offered for reconditioning or triple rinsed (or equivalent) before recycling, reconditioning, or disposal in an approved landfill.

GENERAL: Consult Federal, State or Local disposal authority for alternative procedures.
