

SALIN 89

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Danger
Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES permit. For guidance contact your regional office of EPA.

PHYSICAL AND CHEMICAL HAZARDS

Strong oxidizing agent. Mix only with water. Use clean utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat, generation of hazardous gases and possible generation of fire explosion. In case of contamination or decomposition do not reseal container. If possible isolate container in open air or well-ventilated area. Flood with large volume of water if necessary.

Active Ingredient:

Trichloro-s-triazinone 99.4 %

Inert Ingredients :

0.6 %

Provides 89% available chlorine

KEEP OUT OF REACH OF CHILDREN

DANGER

Practical Treatment FIRST AID

If swallowed. Feed bread soaked in milk followed by olive oil or cooking oil. Call a physician immediately. If on skin. Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists get medical attention. If in eyes. Flush with cold water for at least 15 minutes. Get medical attention.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

DIRECTIONS FOR USE

SALIN 89 is recommended for use in either industrial cooling water, air washing systems and waste treatment system waters. It is used to control algae, bacteria, fungi and algal slime. For cooling towers prior to its use systems must be cleaned to remove algal growth, microbiological slime and other deposits. For badly fouled systems add 3/4 to 1-1/2 lbs. of SALIN 89 biocide per 10,000 gallons of water. This provides 10 ppm and 20 ppm available chlorine. Repeat dosage each day until system is free of visible fungi and algal slime.

Subsequent slug additions of 2-4 to 5 oz. SALIN 89 biocide daily per 10,000 gallons of system water based on the total weight of water in the system. This will provide 2 to 4 ppm free available chlorine. The frequency of addition depends upon the relative amount of bleedoff and severity of the microbiological problem.

SALIN 89 is used to control bacteria in industrial air washing systems that maintain effective mist eliminating components. Maintain 4 oz. to 6 oz. of SALIN 89 biocide per 10,000 gallons of water in the system. This provides a level of 4 to 5 ppm of chlorine respectively. Once system waters are under control add 3/4 to 1-1/2 oz. of SALIN 89 per 10,000 gallons of water daily. A level of .5 to 1.0 ppm will be maintained of available chlorine.

Testing: Contact your local Hydra-Tone representative for further instruction for proper test methods designed for SALIN 89.

STORAGE AND DISPOSAL

Keep product dry in tightly closed containers when not in use. Store in a cool dry, well-ventilated area away from heat or open flame. In case of a decomposition isolate container if possible and flood with large amounts of water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area or bury in a safe place.
