ARIZA-CLOR

FOR SWIMMING POOL CHLORINATION

ACTIVE INGREDIENT
SODIUM HYPOCHLORITE 9.2%
INERT INGREDIENTS 90.8%

**KEEP OUT OF REACH OF CHILDREN
DANGER**

FIRST AID: If on skin, wash with plenty of soap and water. If in eyes, flush with water for at least 15 minutes. Get medical attention. If swallowed, drink large quantities of milk or gelatin solution or, if these are not available, drink large quantities of water. Do NOT give vinegar or other acids. Do NOT induce vomiting. Get prompt medical attention.

See additional precautions on side panel.

**DIRECTIONS FOR USE
GENERAL CLASSIFICATION**

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

DIRECTIONS FOR SWIMMING POOL CHLORINATION

For new pools for spring start-up, superchlorinate with one (1) pint (16 fl. oz.) of this solution for each 2500 gallons of water. This dosage provides 10 ppm available chlorine by weight.

For Pool Maintenance:
A. Adjust water pH to 7.6-7.8 range and maintain.
B. Add one (1) pint of this solution to 2500 gallons of water at a rate of 10 ppm available chlorine. One (1) pint (16 fl. oz.) of this solution for each 6000 gallons of water will provide 10 ppm available chlorine. Frequency of addition is dependent on pool size, bather load, pool temperature and number of swimmers. The residual chlorine level should be maintained at 1.0 ppm.

**DIRECTIONS FOR DISINFECTION OF POTABLE WATER
FOR HOME WELL WATER SYSTEMS**

Use this sodium hypochlorite solution in the ratio of one part sodium hypochlorite to 50 parts of water. Mix sodium hypochlorite solution and water thoroughly in a clean container. Add to the water being treated. Maintain a residual of at least 2 ppm for 30 minutes. Test for residual chlorine with a test kit. If the residual is less than 2 ppm, add more solution. If the residual is 2 ppm or more, the water is safe to drink.

DIRECTIONS FOR SANITIZING FOOD PROCESSING OR DAIRY EQUIPMENT

Use this sodium hypochlorite solution in the ratio of one part sodium hypochlorite to 50 parts of water. Mix sodium hypochlorite solution and water thoroughly in a clean container. Add to the water being treated. Maintain a residual of at least 2 ppm for 30 minutes. Test for residual chlorine with a test kit. If the residual is less than 2 ppm, add more solution. If the residual is 2 ppm or more, the water is safe to use.

NOTE: This product is not intended for use on food surfaces. Do not use on food surfaces.

STORAGE AND DISPOSAL: Store in a cool, dry area away from children and pets. Do not store in plastic containers. Do not mix with other chemicals. Do not pour down drain. Do not use in confined spaces. Do not use in areas where there is a fire hazard. Do not use in areas where there is a risk of explosion. Do not use in areas where there is a risk of fire. Do not use in areas where there is a risk of injury. Do not use in areas where there is a risk of death.
