Attention: Mark Garneau
Chemist

Subject: Sea Hawk Mission Bay CSF Copper-Free Antifouling Coating
EPA Reg. No. 44891-17
Amendment Application Date: November 8, 2006
EPA Received Date: November 17, 2006

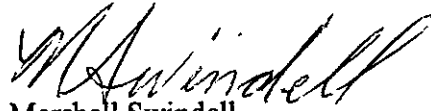

The amendment referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable provided the following label revisions are inserted:

- Language on the front panel stating "Nano-Based Technology" needs to be omitted from the label. EPA is currently reviewing the science for this technology and the Agency has not registered any nano-based products. Until this technology is better understood, all references thereof needs to removed from your label.
- In the Precautionary Statements section, under *Hazards to Humans and Domestic Animals*, additional language needs to be included. Specifically, you applied for this registration as a me-too product (application date March 31, 2005) citing acute toxicity data from EPA Registration No. 64684-6 (Product Name "EP 2000", manufactured by the company E Paint). EPA Registration No. 64684-6 specifies particular precautionary labeling based on acute toxicity data and for commercial Protective Personal Equipment (PPE) concerns. Since your registration is designated as a me-too, the language in EPA Registration No. 64684-6 is required for your label. Attached with this letter is a copy of EPA Registration No. 64684-6 for your perusal.
- Language for the First Aid section needs to be removed from its location on the back panel and moved to the front panel, as listed in EPA Registration 64684-6.

Consequently, the Agency has no objection to your company amending the product label to change "Recommended Coat 3" instead of 2 in the product information section. A stamped copy of your label is enclosed for your records.

If you have any questions concerning this letter, please contact Demson Fuller at (703) 308-8062.

Sincerely,

Marshall Swindell
Product Manager (33)
Regulatory Management Branch 1
Antimicrobials Division (7510C)

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

GENERAL DESCRIPTION

Hard abrasive, multi-seasonal, water-based antifoulant. Provides protection against algae, Barnacles, annelids, tunicates, bryzoa, hydroids, zebra mussels and other fouling organisms. Mission Bay CSF is abrasion resistant for scrubbing, tailoring and dry storage. Reduces Paint buildup. This product may only be used to treat the surfaces of hulls on boats and vessel. This product is intended for both salt and fresh water use. Product applies easily and dries quickly. It may be used over old antifouling finishes in good condition. Mission Bay CSF is an antifouling paint in a high-technology vehicle that withstands frequent trailering, beaching and launching.

Shake vigorously for several minutes with a mechanical paint shaker before use. Due to the settlement in the product, if this product is not properly shaken it will become ineffective.

SHAKE VIGOROUSLY FOR A MINIMUM OF 10 MINUTES BEFORE APPLICATION
