**DIRECTIONS  
GENERAL**

It is a violation of Federal law to use this product in a manner inconsistent with its label.

**DIRECTIONS FOR SWIMMING POOLS:**  
For a new pool or for spring cleaning, add 16 fl. ozs. of sodium hypochlorite solution to 10,000 gallons of water. This dosage is based on available chlorine by weight.

**FOR POOL MAINTENANCE:**

A) Adjust pool water pH to 7.2 to 7.6.  
B) Add manually or by automatic feeder, 1/2 lb. of sodium hypochlorite solution at a rate to maintain 0.6 to 1.0 ppm. One half gallon of 6% available chlorine by weight solution for each 6000 gallons of water. Maintain 0.6 to 1.0 ppm available chlorine by weight, temperature and of night. Test the pH and chlorine daily.

**NOTE:** This product degrades rapidly in sunlight. Increase dosage as necessary to maintain available chlorine.

**STORAGE AND DISPOSAL:** Store in original container, away from direct sunlight. In case of spill, absorb with sawdust or other inert material. Rinse empty container with water. Return to manufacturer or dispose of by burying in an approved land disposal unit. Do not use if container is damaged. Should be diluted with water before disposal. Do not contaminate water, sewer, or other water source. Do not contaminate cleaning of equipment.

# WARNING STATEMENTS

## POOLS AND DOMESTIC ANIMALS

Use severe skin irritation or chemical eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on face shield and rubber gloves when hands after handling. Vacate poorly possible. Do not return until odors

PS: This pesticide is toxic to fish, keep ponds. Treated effluent cannot be used in ponds or public waters unless a For guidance, contact the regional Protection Agency

## DIRECTIONS FOR USE GENERAL CLASSIFICATION

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

### DIRECTIONS FOR SWIMMING POOL CHLORINATION

For a new pool or for spring start-up, superchlorinate with one (1) pint (16 flu. ozs.) of sodium hypochlorite solution for each 2500 gallons of water. This dosage is equivalent to 5 ppm available chlorine by weight.

### FOR POOL MAINTENANCE:

- A) Adjust pool water pH to 7.6 - 7.2 range and maintain.  
B) Add manually or by a feeder device, sodium hypochlorite solution at a rate to maintain an available chlorine residual of 0.6 to 1.0 ppm. One half pint (8 flu. ozs.) of sodium hypochlorite solution for each 6000 gallons of water will provide 1.0 ppm available chlorine by weight. Frequency of additions to maintain 0.6 to 1.0 ppm available chlorine will depend on temperature and of number swimmers. Use test kit to make certain the pH and chlorine residual are in the proper range.

**NOTE:** This product degrades with age. Use a chlorine test kit and increase dosage as necessary, to obtain the required level of available chlorine.

**STORAGE AND DISPOSAL:** Store in a cool, dry area away from direct sunlight. In case of spill, flood area with large quantities of water. Rinse empty container thoroughly with water and either return to manufacturer or discard by placing in trash collection or burying in an approved land fill. Product or rinsate that cannot be used, should be diluted with water and disposed of in a sanitary sewer. Do not contaminate food or feed by storage, disposal or cleaning of equipment.
