DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
Place the dog on a table or bench, preferably out of doors. Hold can in an upright position 3-6" from the dog, and thoroughly spray all over the body against the lay of the coat. Avoid spraying into the eyes. The hair should be slightly damp down to skin level. Spraying time should be between 30 and 60 seconds on a medium sized dog. This can will provide 4-6 complete treatments.

Each application remains active in the coat, killing fleas and protecting against reinfestation for up to one month after spraying. Repeat treatment as necessary. Spray bedding and sleeping area since fleas do not spend all their life cycle on the dog.

Free fleas from fleas before they bear pups.
