**FAST ACTING AID FOR CLEANLINESS
DISINFECTANT AND ODOR CONTROL**

IDEAL FOR LAVATORY AND TOILET SYSTEMS.

DIRECTIONS

TOILETS: For most positive results remove water from bowl by forcing water over trap. Squirt stream of minimum 1 ounce over inside surface of bowl. Spread over surface with bowl brush, thoroughly cover entire surface including under rim at water outlets, outer bowl rim and seat. Concentrate clings to surface and gives time required for chemical action. Add one ounce minimum of Concentrate to water. Swab entire surface with solution. A quick light rinsing removes all adhered Concentrate. Wipe outer rim of bowl and seat with a damp sponge.

URINALS: Squirt stream of Concentrate, minimum 2 ounces on walls. Spread over entire surface with brush, including grooves along side of water outlets. Allow to remain on surface 5 minutes and flush. Remove screen at trap and pour in one ounce of Concentrate. Swab inside of pipes.

SEPTIC SYSTEMS. Concentrate will not effect action or performance of septic and chemical systems.

DANGER CORROSIVE

Contains hydrochloric acid. Keep out of reach of children. May be fatal or harmful if swallowed. Do not breathe vapor or fumes. Produces chemical burns. Do not get in eyes, on skin, or on clothing.

ANTIDOTE

If swallowed call a physician immediately. Drink a spoonful or more of milk of magnesia or a cup of soapy water followed with milk or raw egg whites.

EYE CONTACT: Wash with water for 15 minutes. Get prompt medical attention.

SKIN CONTACT: Wipe off the acid gently, immediately flood the surface with water, using soap freely, then cover with moist magnesia or baking soda.

NOTE: Empty containers and rinse with water before disposing. In case of spillage, wash area with water. Do not mix with other compounds. Avoid splashing on nylon and cotton.
