

PRECAUTIONARY STATEMENTS  
HAZARDS TO HUMANS & DOMESTIC ANIMALS

**CAUTION**

May be harmful if swallowed, inhaled or absorbed through the skin. Avoid contact with eyes, skin and clothing. Avoid breathing dust. Wash thoroughly after handling. Keep away from food, feedstuffs, and domestic water supplies.

**ENVIRONMENTAL HAZARDS**

Do not apply directly to water except as specified in the labeling. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply only as specified on this label.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**FOR POND AND LAKE WEEDS:** To control waterweeds, water thyme, dutch moss, milfoil, fanwort, tape grass, naiad, ludwigia, and pondweed. Apply STEWART PHARMACAL 2,4-D 20% GRANULAR HERBICIDE at rate of 1 pound per 430 square feet of water surface. Application should be made on smooth surface infested with weeds so that the granules settle to the bottom around roots and stems. The time for maximum kill may extend to 4-6 weeks. Control can be obtained for approximately 1-3 years. Easy applications can be made on ice surfaces just before spring thaw occurs. Apply STEWART PHARMACAL 2,4-D 20% GRANULAR HERBICIDE at rate of 100 lbs. per acre.

Decaying vegetation in treated areas may deplete the supply of oxygen. Consequent suffocation of fish may be avoided by treating 1/3 to 1/2 of the water area in a single operation. Begin treatment along the shore and proceed outwards because this leaves untreated areas into which fish will migrate. These untreated areas may be treated after the vegetation in the originally treated areas has thoroughly decayed, approximately 2-3 months.

Consult and obtain appropriate permits from state agencies before applying this product.
