

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Corrosive, may cause severe skin irritation or chemical burns to broken skin. Causes eye damage. May be fatal if swallowed. Avoid breathing vapors. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling this product. Wash hands after handling. Vacate poorly ventilated areas as soon as possible. Do not return until fumes have dissipated.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and out of lakes, streams or ponds. Treated effluent cannot be discharged into lakes, streams, ponds or public water bodies until a discharge permit is obtained. For guidance, contact the regional office of the Environmental Protection Agency.

PHYSICAL AND CHEMICAL HAZARDS: STRONG OXIDIZING AGENT: Mix only with water according to label directions. Mixing this product with gross filth such as feces, urine, etc., or with ammonia, acids, detergents or other chemicals will release hazardous gases irritating to eyes, lungs and mucous membranes.

CHLORINATING SOLUTION

ACTIVE INGREDIENT: **SODIUM HYPOCHLORITE** 9%
INERT INGREDIENTS: 91%

**KEEP OUT OF REACH OF CHILDREN
DANGER**

FIRST AID: If swallowed, give 1-2 glasses of water. If in eyes, flush with water for 15 minutes. Get medical attention. If on skin, wash with soap and water. If inhaled, get fresh air. If inhaled, get fresh air. If inhaled, get fresh air.

DIRECTIONS FOR USE GENERAL CLASSIFICATION

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

DIRECTIONS FOR SWIMMING POOL

For a new pool or for spring start-up, superchlorinate with 16 fl. ozs. of sodium hypochlorite per 10,000 gallons of water. This dosage is equivalent to 1.0 ppm available chlorine by weight.

FOR POOL MAINTENANCE:

- A) Adjust pool water pH to 7.6 - 7.2 range.
- B) Add manually or by a feeder device 1/2 pint of sodium hypochlorite solution at a rate to maintain an available chlorine residual of 0.6 to 1.0 ppm. One half pint (8 fl. ozs.) of sodium hypochlorite solution for each 6000 gallons of water. Maintain 0.6 to 1.0 ppm available chlorine by weight. Frequent testing is necessary to maintain temperature and of number swimmers. Maintain the pH and chlorine residual.

NOTE: This product degrades with age. Increase dosage as necessary to obtain available chlorine.

STORAGE AND DISPOSAL: Store in a cool, dry place, away from direct sunlight. In case of spill, flood area with water. Rinse empty container thoroughly. Return to manufacturer or discard by pouring in an approved land fill. Product used should be diluted with water and sewer. Do not contaminate food or for cleaning of equipment.

INERT INGREDIENTS
**KEEP OUT OF REACH OF CHILDREN
DANGER**

FIRST AID: If in eyes, wash with plenty of cool water. If eyes float with water for at least 15 minutes. If swallowed, drink large quantities of water. If on skin, wash with plenty of water. Do not give vomit. Do not give anyone else anything to eat or drink. Get prompt medical attention.

DIRECTIONS FOR USE GENERAL CLASSIFICATION

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

DIRECTIONS FOR SWIMMING POOL CHLORINATION

For a new pool or for spring start up, superchlorinate with one (1) pint (16 fl. oz.) of sodium hypochlorite solution for each 2500 gallons of water. This dosage is equivalent to 5 ppm available chlorine by weight.

FOR POOL MAINTENANCE

A) Adjust pool water pH to 7.2-7.6 range and maintain.
B) Add manually or by a feeder device sodium hypochlorite solution at a rate to maintain an available chlorine residual of 1.0 to 1.2 ppm. One half pint (8 fl. oz.) of sodium hypochlorite solution for each 6000 gallons of water will provide 1.0 ppm available chlorine by weight. Frequency of addition to maintain 0.6 to 1.0 ppm available chlorine will depend on temperature and number swimmers. Use test kit to measure chlorine and pH and check residual chlorine in the pool regularly.

NOTE: This product degrades with age. Use only fresh product. Increase dosage as necessary to maintain the required available chlorine.

STORAGE AND DISPOSAL: Store in a cool, dry place. Do not store in direct sunlight. In case of fire, use water to extinguish. Do not use if container is empty, damaged, or leaking. Wash thoroughly with water before reuse. Do not mix with other chemicals. Do not use in confined spaces. Do not use in areas where it may come in contact with food or feed. Do not use in areas where it may come in contact with children or pets. Do not use in areas where it may come in contact with livestock. Do not use in areas where it may come in contact with wildlife. Do not use in areas where it may come in contact with aquatic life. Do not use in areas where it may come in contact with birds. Do not use in areas where it may come in contact with mammals. Do not use in areas where it may come in contact with reptiles. Do not use in areas where it may come in contact with amphibians. Do not use in areas where it may come in contact with invertebrates. Do not use in areas where it may come in contact with plants. Do not use in areas where it may come in contact with fungi. Do not use in areas where it may come in contact with bacteria. Do not use in areas where it may come in contact with viruses. Do not use in areas where it may come in contact with parasites. Do not use in areas where it may come in contact with pathogens. Do not use in areas where it may come in contact with toxins. Do not use in areas where it may come in contact with allergens. Do not use in areas where it may come in contact with irritants. Do not use in areas where it may come in contact with corrosives. Do not use in areas where it may come in contact with carcinogens. Do not use in areas where it may come in contact with mutagens. Do not use in areas where it may come in contact with reproductive toxins. Do not use in areas where it may come in contact with developmental toxins. Do not use in areas where it may come in contact with neurotoxins. Do not use in areas where it may come in contact with immunotoxicants. Do not use in areas where it may come in contact with endocrine disruptors. Do not use in areas where it may come in contact with carcinogenic agents. Do not use in areas where it may come in contact with mutagenic agents. Do not use in areas where it may come in contact with reproductive toxicants. Do not use in areas where it may come in contact with developmental toxicants. Do not use in areas where it may come in contact with neurotoxicants. Do not use in areas where it may come in contact with immunotoxicants. Do not use in areas where it may come in contact with endocrine disruptors.

HAZARD STATEMENTS AND DOMESTIC ANIMALS

Severe skin irritation or chemical eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear eye protection, face shield and rubber gloves when handling. Vacate pool if possible. Do not return until odors disappear.

This pesticide is toxic to fish, keep out of ponds or public waters unless authorized. For guidance, contact the regional office of the Environmental Protection Agency.

HAZARDS: STRONG OXIDIZING
According to label directions. Mixing with other chemicals will increase hazard to eyes, lungs and mucous membranes.
