**DIRECTIONS FOR SHOCKING
TREATMENT OF SWIMMING
WATER FOR CONTROL OF ALGAE**

If algae growth develops resulting in a slimy feel to the pool sides, or in the pool water, shock treat pool water and Super Shock initiated. Adjust pool water pH to 7.2-7.6. Add one (1) gallon of Super Shock evening for each 14,000 gallons of water. This dosage is equivalent to 1 ppm available chlorine by weight. Circulate the pool water for a minimum of 6-8 hours, at 5-10 ppm available chlorine. Brush pool sides and bottom to loosen the dead algae, and vacuum the following morning. Do not allow swimmers to use the pool until a chlorine level of 1.0-3.0 ppm has been established in the pool water. Repeat shock treatment if necessary.

STORAGE AND DISPOSAL: Store in original container, away from direct sunlight. In case of spill, flood area with water and absorb with an empty container thoroughly with water and either recycle or bury in an approved landfill. Do not use, should be diluted with water and disposed of in a landfill. Do not contaminate food, or feed by storage.

DIRECTIONS FOR USE GENERAL CLASSIFICATION

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT
IN A MANNER INCONSISTENT WITH ITS LABELING.

DIRECTIONS FOR SHOCK TREATMENT OF SWIMMING POOL WATER FOR CONTROL OF ALGAE

If algae growth develops resulting in greenish growth on the pool side and/or bottom, a slimy feel to the pool side, or cloudiness in the pool water, shock treatment of the pool water and Super Shock should be initiated. Adjust pool water pH to 7.2-7.6, add one (1) gallon of Super Shock in the evening for each 14,000 gallons of pool water. This dosage is equivalent to 10 ppm available chlorine by weight. After circulating the pool water for a minimum of four hours, at 5-10 ppm available chlorine, turn the pool water recirculation system off, brush pool sides and bottom thoroughly to loosen the dead algae, and vacuum the pool the following morning. Do not allow swimmers to use the pool until a chlorine residual of 1.0-3.0 ppm has been established in the pool water. Repeat shock treatment as necessary.

STORAGE AND DISPOSAL: Store in a cool, dry area away from direct sunlight. In case of spill, flood area with large quantities of water. Rinse empty container thoroughly with water and either return to manufacturer or discard by placing in trash collection or burying in an approved landfill. Product or rinsate that cannot be used, should be diluted with water and disposed of in a sanitary sewer. Do not contaminate food, or feed by storage, disposal or cleaning of equipment.
