DIRECTIONS FOR USE USE ONLY AS DIRECTED

It is a violation of Federal Law to use this product in a manner inconsistent with the label directions.

Black Algaecide is used to control the growth of algae in swimming pools, whirlpools and hot tubs. For maximum effectiveness, pools, exterior spas and hot tubs containing heavy growth of algae should be cleaned prior to using Black Algaecide.

For pool having just visible algae growth, add an initial dose of 1.1 to 1.4 fluid ounces of Black Algaecide per 10,000 gallons of water and remove settled algae debris. For treatment of a freshly cleaned and filled pool, add initially 6 to 11 fluid ounces of Black Algaecide per 10,000 gallons of water. Subsequent additions of 2 to 7 fluid ounces of Black Algaecide per 10,000 gallons of water should be made every 5 to 7 days for maintenance.

Spas, whirlpool or hot tubs having just visible growth require an initial dose of 0.6 to 1.1 fluid ounces of Black Algaecide per 1,000 gallons of water. For treatment of a whirlpool, spa or hot tub, add initially 0.6 to 1.1 fluid ounces of Black Algaecide per 1,000 gallons of water. Subsequent additions of 0.2 to 0.4 fluid ounces of Black Algaecide per 1,000 gallons of water should be made every 5 to 7 days after initial treatment.

Black Algaecide is compatible with those chemicals normally used to treat swimming pools. It is effective at both acid and alkaline pH. Black Algaecide can be used in conjunction with chlorine chemical and may reduce the amount of those chemicals required. However, do not mix Black Algaecide with concentrated dry or liquid chlorine.
