

MAR 27 2001

Mr. Mark Jernigan
Aqua-Clear Industries, Inc.
PO Box 1489
Decatur, GA 30031

Dear Mr. Jernigan:

Subject: Change Product Name and Revised Labeling
Aqua-Clear Non-Forming Algaecide 60
EPA Registration No. 45309-2
Amendment application of February 1, 2001

The amendment referred to above, submitted in connection with registration under FIFRA sec. 3(c)(7)(A), is acceptable provided that you:

Submit two copies of your final printed labeling before you release the product for shipment. Refer to the A-79 Enclosure for further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for you records.

Sincerely your,

Adam Heyward
Product Manager (34)
Regulatory Management Branch II
Antimicrobials Division (7510W)

{Directions to be used for swimming pool & spa algaecide.}

SWIMMING POOL AND SPA ALGAECIDE AND ALGAE PREVENTATIVE

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

Aqua-Clear Non-Foaming Algaecide 60 is used to control the growth of algae in swimming pools, exterior spas, whirlpools and hot tubs. For maximum effectiveness, pools, spas, whirlpools and hot tubs containing heavy growth of algae, should be cleaned prior to using this product.

For pools having just visible algae growth, add an initial dose of 11 to 17 fluid ounces of this product per 10,000 gallons of water and remove settled algae debris by cleaning. For treatment of a freshly cleaned and filled pool, add initially 6 to 11 fluid ounces of this product per 10,000 gallons of water. Subsequent additions of 2 to 4 fluid ounces of this product per 10,000 gallons of water should be made every 5 to 7 days after initial treatment for maintenance.

Spas, whirlpools or hot tubs having just visible growth require an initial dose of $\frac{1}{2}$ to 1 teaspoon of this product per 100 gallons of water. For treatment of a freshly cleaned whirlpool, spa or hot tub, add initially $\frac{1}{4}$ to $\frac{1}{2}$ teaspoon of this product per 100 gallons of water. Subsequent additions of $\frac{1}{8}$ to $\frac{1}{4}$ teaspoon of this product per 100 gallons of water should be made every 5 to 7 days after initial treatment for maintenance.

This product is compatible with those chemicals normally used to treat pools and spas and is effective at both acid and alkaline pH. This product can be used in pools and spas treated with chlorinating chemicals and may reduce the amount of those chemicals normally required. Do not mix this product with concentrated dry or liquid chlorinating products.

{Directions to be used for swimming pool algaecide.}

SWIMMING POOL ALGAECIDE AND ALGAE PREVENTATIVE

This product is used to control and prevent the growth of algae in swimming pools [and swimming pools with attached spas] [and swimming pools with attached spas, waterfalls, or decorative fountains]. This product may be used in chlorinated or brominated systems. This product will not foam and prevents all types of algae.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

Ensure all equipment is working properly. Backwash the filter system following manufacturer's directions. Adjust pH to between 7.2-7.6. In chlorinated pools, add stabilizer to establish a minimum stabilizer level of 30-40 ppm to reduce the degradative effects of sunlight upon the chlorine residual. Check for metals and if present add a stain and scale inhibitor to prevent staining of pool surface due to metals. Adjust chlorine residual to 1-3 ppm. When using other products as outlined in directions for this product, always follow directions on those products.

Pools containing heavy growth of algae should be cleaned prior to using this product. For pools having light algae growth, pour directly into pool initial dose of 11-17 fluid ounces of this product per 10,000 gallons of water and remove settled algae debris by cleaning. For treatment of a freshly cleaned and filled pool, pour directly into pool initial dose of 6-11 fluid ounces of this product per 10,000 gallons of water. Additions of 2-4 fluid ounces of this product per 10,000 gallons of water should be made every 5-7 days after initial treatment for maintenance.

{Directions to be used for spa algaecide.}

ALGAECIDE AND ALGAE PREVENTATIVE FOR SPAS AND HOT TUBS

This non-foaming product is used to control the growth of algae in spas, whirlpools, and hot tubs. This product may be used in chlorinated or brominated systems.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

Ensure all equipment is working properly. Backwash the filter system following manufacturer's directions. Adjust pH to between 7.2-7.6. Adjust chlorine residual to 1-3 ppm or bromine residual to 2-4 ppm. When using other products as outlined in directions for this product, always follow directions on those products.

Spas containing heavy growth of algae should be cleaned prior to using this product. Spas, whirlpools, or hot tubs having just visible algae growth require an initial dose of ½ to 1 teaspoons of this product per 100 gallons of water. For treatment of a freshly cleaned and filled spa, whirlpool, or hot tub, add initially ¼ to ½ teaspoon of this product per 100 gallons of water. Subsequent additions of 1/8 - 1/4 teaspoons of this product per 100 gallons of water should be made every 5 to 7 days after initial treatment for maintenance.

{Directions to be used for winter pool algae preventative.}

WINTER ALGAE PREVENTATIVE FOR SWIMMING POOLS

This product when used as directed will prevent growth of most algae during the off-season winter months when pools are not in use.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

For pools which have been properly treated during the swimming season and are free of visible algae, add 6-10 fluid ounces of this product per 10,000 gallons of water. If at the end of the swimming pool season pool has some visible algae growth, add 12-17 fluid ounces per 10,000 gallons. It is necessary that a uniform distribution of this product throughout the pool be made for maximum effectiveness. If pool is not covered, it may be necessary to repeat the treatment one or more times during the off season.
