## AQUA CLEAR AQUA STICKS

Concentrated Pool Chlorinating Sticks

### ACTIVE INGREDIENT:

Trichloro-s-triazinetrione 99%

OTHER INGREDIENTS 1%

TOTAL INGREDIENTS: 100%

Available Chlorine 90%

KEEP OUT OF REACH OF CHILDREN

**DANGER**

CONTAMINATION MAY CAUSE FIRE • ADD ONLY TO WATER

See side label for first aid and precautions

Net Weight:

EPA REG. # 45309-9

EPA EST. # 5185-GA-1

**DIRECTIONS FOR USE:** It is a violation of federal law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

This product is designed to dissolve quickly and completely providing a steady source of available chlorine in swimming pools to control the growth of algae, kill bacteria and destroy organic contaminants.

**READ PRECAUTIONARY STATEMENTS BEFORE USE**

1. Adjust the water pH to 7.2 to 7.6 as determined by a test kit. For pools with copper plumbing, best pH factor is 7.6 to 7.8.
2. If the pool has not been previously stabilized, add Chlorine Stabilizer (cyanuric acid). Follow the directions for use on the label for that product.
3. Adjust and maintain the total alkalinity between 80 and 120 ppm as determined by a suitable test kit.
4. Secure chlorinator in the area of the pool that is agitated by return flow from the filter. If residual remains too high, chlorinator should be moved further from the agitated area which will slow the dissolving action of the sticks.
5. In newly filled pools, follow steps 1 through 4, then add one (1) 8 oz. stick per 12,500 gallons of pool water to establish a chlorine residual of 1.0 to 4.0 ppm as determined by a test kit. Repeat dosages as needed to maintain a chlorine residual of 1.0 to 1.5 ppm at all times. Thereafter, add one (1) 8 oz. stick per 25,000 gallons of pool water as needed to maintain a chlorine residual of 1.0 to 4.0 at all times as determined by a test kit.

**Reentry into treated pools is prohibited above levels of 4 ppm of chlorine.**

**SUPERCHLORINATION:** Superchlorination is necessary at the start of the bathing season, upon filling the pool, every week during hot weather and following heavy rains. Superchlorination is performed by adding two to three times the normal amount of chlorine to oxidize and remove unwanted organic and inorganic material. A granular chlorinated agent, which will dissolve quickly, should be used for superchlorination. Follow the directions for use found on the granular product labeled for superchlorination use. Bathers should not be permitted to enter the pool during superchlorination until the chlorine residual is less than 4.0 ppm.

**Please Note:** The pH of this product is on the acid side and will tend to reduce the pH and total alkalinity of the pool water. Proper pH should be maintained at pH 7.2 to 7.6 as determined by a test kit, by periodic additions of sodium carbonate or sodium bicarbonate.

3/4

**STORAGE AND DISPOSAL:**

**STORAGE:** Keep product dry in tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. **DISPOSAL:** Non-refillable container. Do not reuse or refill this container. Rinse empty container thoroughly with water to dissolve all material before discarding. Offer for recycling if available.

**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**DANGER : CORROSIVE:** Causes irreversible eye damage and skin burns. May be fatal if absorbed through skin. May be fatal if inhaled. Do not breathe dust or spray mists. Irritating to nose and throat. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield, protective clothing and rubber gloves when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking, or using tobacco. Remove contaminated clothing and wash before reuse.

**FIRST AID: IF SWALLOWED:** Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person. **IF IN EYES:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. **IF ON SKIN OR CLOTHING:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. **IF INHALED:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. [IN CASE OF MEDICAL EMERGENCY, CALL [1-303-623-5716] [1-877-800-5553] [telephone number supplied by supplemental registrant].]

**Note to Physician:** Probable mucosal damage may contraindicate the use of gastric lavage.

**CHEMICAL HAZARDS: DANGER:** Strong oxidizing agent. Use only clean, dry utensils. Mix only into water. Contamination with moisture, dirt, organic matter or other foreign matter may start a chemical reaction with generation of heat, liberation of hazardous gases and possible generation of fire and explosion. Avoid any contact with flaming or burning material such as a lighted cigarette. Do not use this product in any chlorinating device which has been used with any inorganic or unstabilized chlorinating compounds (e.g., calcium hypochlorite). Such use may cause fire or explosion.

{Environmental hazards statement for end-use products in containers of less than 50 pounds (solid, dry weight).}

[**ENVIRONMENTAL HAZARDS** This pesticide is toxic to fish and aquatic organisms.]

{Environmental hazards statement for end-use products in containers of equal to or greater than 50 pounds (solid, dry weight).}

[**ENVIRONMENTAL HAZARD:** This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other public waters unless this product is specifically identified and addressed in a National Pollutant Discharge Elimination System Permit (NPDES) and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority, For guidance contact your State Water Board or Regional Office of the EPA.]

NOTE: Buyer assumes all responsibility for safety and use not in accordance with directions.
