

SPA CLEAR

SPA CHLOR™ FORMULA II

DIRECTIONS FOR USE:

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Adjust the pH of the spa or hot tub to between 7.2 and 7.8. The total alkalinity should be maintained between 124 and 175 ppm. Chlorine residual should be between 1.0 and 3.0 ppm before entering spa or hot tub.

Use one-quarter ounce of Spa Chlor Formula II per 250 gallons of water as an initial treatment. Repeat the procedure until a residual of 2.0 to 3.0 ppm is established. Frequent testing to determine additional doses needed to maintain the proper residual is highly recommended. Use a reliable test kit with fresh solutions for pH and chlorine testing.

Weekly superchlorinate using one-half ounce of Spa Chlor Formula II per 250 gallons of water. Do not enter the spa until the available chlorine residual falls to 3.0 ppm.

Note: Draining and cleaning of spa or hot tub is recommended every 5-8 weeks. Never mix this product or any dry or liquid chemical products as dangerous reaction may occur.

ACTIVE INGREDIENT:

Lithium Hypochlorite 29%*

INERT INGREDIENT: 71%
*provides 35% available chlorine

KEEP OUT OF REACH OF CHILDREN

STORAGE AND DISPOSAL

Keep product dry in a tightly closed container when not in use. Store in a cool dry well ventilated area away from heat or open flame. In case of decomposition, empty container in an open area if possible and flood with large amounts of water. Do not re-use empty container. Rinse empty container thoroughly with water to dissolve all material before discarding. Follow local collection or disposal in approved landfill area or bury in safe place.

DANGER

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Corrosive. Causes eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Irritating to nose and throat. Avoid breathing dust. May cause burns to broken skin. Wear goggles or face shield and protective clothing when handling. Wash hands after handling.

FIRST AID (PRACTICAL TREATMENT):

If swallowed: feed fruit, cooked cereal or bread soaked in milk, followed by olive oil or cooking oil. In case of personal contact, remove excess material and flush skin or eyes with cold water for at least 15 minutes. For eyes get medical attention as soon as possible. Remove and wash contaminated clothing before reuse.

CHEMICAL HAZARDS

Strong oxidizing agent. Do not use moist or damp utensils. Contamination with moisture, organic matter or other chemicals or any foreign matter may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Keep out of lakes, streams, ponds or public waters. Do not allow required for discharges containing this pesticide into public waters. For guidance contact the regional office of the Environmental Protection Agency.

SPECIAL PRECAUTIONS - PLEASE READ!

1. This product has a powerful chlorine odor. Hold away from face when opening, avoid breathing fumes.
2. Prolonged contact between this product in its undiluted state and vinyl liners or painted surfaces will result in bleaching of the vinyl or paint.
3. When adding this product to swimmer or leader, make sure there are no other chemicals present as a violent reaction may occur. It is always dangerous to mix chemicals.
4. Use this product as directed as per instructions per label. Do not take advice from others or experiment by yourself.
5. If this product is used to shock or superchlorinate a pool, after treatment is finished do not wash and floor to expose algae that may be in cracks or whistles that might protect algae from high chlorine residual. Such protected algae will begin to reproduce again when high chlorine residual falls.
6. This product because of its potent formulation can be dangerous if not used properly. Do not mix with any other chemicals. This could result in a violent chemical reaction. Do not use water in this product in a closed container. Do not add this product to a small amount of water in a pool. When adding this product to swimmer, make sure pump, fan and water is circulating so that material is drawn into recirculation system. Do not allow build up of dry material in swimmer as gases may generate and cause an explosion.
