Strong oxidizing agent. Do not use moist or damp utensils. Can combine with moisture, soil, organic matter, or other chemicals or any foreign matter may start a chemical reaction with generation of heat, liberation of hazardous gases, and loss of concentration.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Keep out of lakes, streams, ponds, or public waters. Permits may be required for discharges containing this pesticide into public waters. For guidance contact the regional office of the Environmental Protection Agency.

SPECIAL PRECAUTIONS (PLEASE READ)

1. This product has a powerful chlorine odor and away from face when opening to avoid breathing fumes.
2. Prolonged contact between this product in its undissolved state and vinyl liners or painted surfaces will result in bleaching of the vinyl or paint.
3. When adding this product to swimming pools make sure there are no other chemicals present as a violent reaction may occur if it is a weak sanitizer to the chemicals.
4. Use this product as directed as per instructions on label. Do not take advice from others or experiment by yourself.
5. If the product is used to shock or superchlorinate a pool after treatment it is important to brush walls and floor to expose algae that may be in cracks or openings that might protect algae from high chlorine residual. Such protective algae will begin to reproduce again when high chlorine residual has.
6. This product because of its potent formulation can be dangerous if not used properly. Do not mix with any other chemicals. This could result in a violent chemical reaction. Do not add water to this product in a closed container. Do not add this product to a small amount of water in a jar. When adding this product to swimming pools, make sure pump is on and water is circulating so that material is drawn into recirculation system. Do not allow build up of dry material in summer as gases may generate and cause an explosion.
