AQUA CHLOR® CHLORINATING SANITIZER

[Lithium Hypochlorite]  
[Chlorinating Sanitizer]  
[Quick dissolving chlorinating granules]  
[Suitable for all pool surfaces]  
[Swimming Pool Sanitizer]

ACTIVE INGREDIENT: Lithium Hypochlorite 29%  
OTHER INGREDIENTS: 71%  
TOTAL INGREDIENTS: 100%  
(Available Chlorine: 35%)

KEEP OUT OF REACH OF CHILDREN

**DANGER**

**FIRST AID: IF INHALED:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call poison control center or doctor for treatment advice. **IF ON SKIN OR CLOTHING:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. **IF IN EYES:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. **IF SWALLOWED:** Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

[IN CASE OF MEDICAL EMERGENCY, CALL [1-303-623-5716] [1-877-800-5553] [telephone number supplied by supplemental registrant].]

Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage.

See [back] [side] panel for additional precautionary statements.

NET WEIGHT:

2/3

This quick-dissolving, non-clouding product is a source of chlorine for routine sanitization of your pool.

**DIRECTIONS FOR USE:** It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

**HOW TO USE THIS PRODUCT:**

To start your pool:

1. Back wash filter.
2. Utilizing your pool test kit, adjust pH of pool water to 7.2 – 7.6. Add soda ash or sodium bicarbonate to correct an acid condition (less than 7.2). Add sodium bisulfate if the pH is greater than 7.6. Maintain pH range of 7.2 – 7.6 for a minimum of six hours before the addition of this product and during the entire season.
3. Use two cups of this product per 5,000 gallons of pool water.

After the proper pH range (7.2 – 7.6) and chlorine residuals (1.0 – 3.0) have been established, it is beneficial to add a chlorine stabilizer (cyanuric acid) to the pool to prevent extreme fluctuations in the chlorine level. Cyanuric acid is available at most pool dealers and should be added in accordance with the instructions on the package for maximum stabilization of the pool water.

**HOW TO MAINTAIN THE PROPER CHLORINE RESIDUAL:**

The chlorine residual should be maintained at between 1.0 – 3.0 ppm, available chlorine as determined by the chlorine test kit. Under normal conditions, this residual can be maintained by the daily addition of about 1/3 cup (2.7 oz.) of this product for each 5,000 gallons of pool water – if the pool water is properly stabilized with 30 – 50 ppm of cyanuric acid pool stabilizer. Severe conditions, such as high temperature, continued use by many people will require a higher daily dosage, whereas smaller doses may suffice in the spring and fall when the pool is not being subjected to normal bather loads.

The pool water should be superchlorinated about once each week. Five times the normal daily addition, or a minimum of one cup (8 oz.) per 5,000 gallons of pool water should be added in the evening when the pool will not be used for a minimum of 12 hours. Test the chlorine residual and if above 3.0 ppm, do not allow swimming until the residual has decreased.

**Reentry into treated swimming pools is prohibited above levels of 3 ppm chlorine due to risk of body injury.**

**SPECIAL PRECAUTIONS  
(PLEASE READ)**

1. This product has a powerful chlorine odor. Hold away from face when opening to avoid breathing fumes.
2. Prolonged contact with this product in its un-dissolved state and vinyl liners or painted surfaces will result in bleaching of the vinyl or paint.
3. When adding this product to a skimmer or feeder make sure there are no other chemicals present as a violent reaction may occur. It is always dangerous to mix chemicals.
4. Use this product as directed as per instructions on label. Do not take advice of others or experiment by yourself.
5. If this product is used to shock or superchlorinate a pool, after treatment it is important to brush walls and floor to expose algae that may be in cracks or wrinkles that might protect algae from high chlorine residual. Such protected algae will begin to reproduce again when high chlorine residual falls.

- 3/3
6. This product because of its potent formulation, can be dangerous if not used properly. Do not add water to this product in a closed container. Do not add this product to a small amount of water in a pail. When adding this product to skimmer make sure pump is on and water circulating so that material is drawn into re-circulation system. Do not allow a build-up of dry material in the skimmer as gases may generate and cause an explosion.

**STORAGE AND DISPOSAL:** Keep this product dry in original tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. Moisture may decompose this product and cause a violent reaction leading to fire and explosion. In case of decomposition, isolate container if possible and flood area with large amounts of water to dissolve all material before discarding this container. Do not contaminate food or feed by storage or disposal. **CONTAINER DISPOSAL:** Non-refillable container. Do not reuse or refill this container. Offer for recycling if available. Rinse thoroughly before discarding in trash.

#### **PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS DANGER:** Corrosive. Causes irreversible eye damage or skin burns. May be fatal if swallowed. Harmful if inhaled. Do not get in eyes, on skin or on clothing. Avoid breathing dust. Wear goggles or safety glasses; protective clothing and rubber gloves when handling. Wash hands thoroughly with soap and water after handling and before eating, drinking, or using tobacco. Remove contaminated clothing and wash before reuse.

**PHYSICAL OR CHEMICAL HAZARDS STRONG OXIDIZING AGENT:** Do not mix with other chemicals, except water. Mix only with water. Never add water to product. Always add product to large quantities of water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction and generate heat, hazardous gas, possible fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well ventilated area. Flood area with large volumes of water, if necessary.

*{Environmental hazards statements for end-use products in containers of less than 50 pounds (solid, dry weight).}*

**[ENVIRONMENTAL HAZARDS** This pesticide is toxic to fish and aquatic organisms.]

*{Environmental hazards statements for end-use products in containers of equal to or greater than 50 pounds (solid, dry weight).}*

**[ENVIRONMENTAL HAZARDS** This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.]

**NOTE:** Buyer assumes all responsibility for safety and use not in accordance with directions.
