DIRECTION

It is a violation of federal law in any manner inconsistent with its label to use this product in a manner designed to dissolve quickly or to provide a steady source of available chlorine in pools to control the growth of algae or to destroy organic contaminants.

READ THE PRECAUTIONARY STATEMENTS

Before initiating daily chlorine treatments (shock treat) the pool water must have a minimum chlorine residual by adding 1.5 lbs. of Aquaclear per 5,000 gallons of water until the desired residual is achieved. The use of a suitable test kit is recommended to determine the chlorine residual to return to the normal range as determined by a chlorine residual test.

During especially hot periods, superchlorinate (shock treat) the pool water to 8.0 ppm as directed above. The use of Aquaclear in the pool can lead to the growth of algae. If algae is present in the pool, use Aquaclear as directed on the product label.

STORAGE AND DISPOSAL: Store in a tightly closed container in a cool, dry, well ventilated area. Do not use empty container thoroughly with water before discarding. Seal with several layers of newspaper.
