DIRE

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS & DOMESTIC
ANIMALS**

CAUTION Harmful if swallowed. Avoid breathing vapor. Avoid contact with skin, eyes, or clothing. Wear mask or respirator of type recommended by NIOSH to give adequate protection against this material. Wear protective clothing. Wash exposed skin with soap and water after handling and before eating. Wash all contaminated clothing with soap and water separately from other clothing before reuse.

Remove pets and cover fish aquariums before spraying. **DO NOT ALLOW CHILDREN IN TREATED AREAS UNTIL SURFACES ARE DRY.**

Do not apply directly to food. In commercial food handling facilities, cover or remove any food and food processing equipment during application. After space spraying in meat packing plants, bakeries and other food processing plants, wash all equipment, benches, shelving, etc. where exposed food will be handled, with an effective cleaning compound followed by a potable water rinse.

STATEMENT OF PRACTICAL**TREATMENT**

IF SWALLOWED: Do not induce vomiting. Call a physician or Poison Control Center immediately. **IF INHALED:** Remove to fresh air. **IF ON SKIN:** Remove contaminated clothing and wash affected area with soap and water. Get medical attention if irritation persists. **IF IN EYES:** Flush eyes with plenty of water. Get medical attention if irritation persists. **NOTE TO PHYSICIAN:** Contains petroleum distillate. Vomiting may cause aspiration pneumonia.

ENVIRONMENTAL HAZARDS

This product is highly toxic to fish. Do not apply directly to water or wetlands. Do not contaminate water when disposing of equipment washwaters.

PHYSICAL OR CHEMICAL HAZARDS

Extinguish open flame before space spraying. **DO NOT USE, POUR, SPILL OR STORE NEAR HEAT OR OPEN FLAME. FLASH POINT MINIMUM: 150°F (65.5°C)**

**KILL QUICK
CONCENTRATE**

An Oil Based Insecticide Concentrate With SBP-1382[®] Synthetic Pyrethrin
(Contains 0.2 pounds of SBP-1382 per gallon)

FOR INDOOR USE IN ULV, MECHANICAL MISTING SPRAYERS, PUMP SPRAYERS, OR THERMAL FOGGERS
Authorized by USDA for use in edible product areas of official establishments operating under
the Meat, Poultry, Shell Egg Grading and Egg Products Inspection Program
FOR HOMES, STORES, INSTITUTIONS, RESTAURANTS, FOOD PROCESSING PLANTS, WAREHOUSES,
INDUSTRIAL INSTALLATIONS AND HORSE STABLES

ACTIVE INGREDIENTS

* Resmethrin 31.00%
* Related Compounds 0.409%
** INERT INGREDIENTS 96.591%

* Cis/trans isomer ratio max 30% (+) cis and min 70% (+) trans
U.S. Patent No. 3,465,007

** contains 92.500% Petroleum Distillate

* For use in SBP-1382-branded equipment, see side

**KEEP OUT OF REACH OF CHILDREN
CAUTION**

See Side Panels for Additional Precautionary Statements.

Use and
for this

DIRECTION FOR USE

It is a violation of the Federal Law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL: Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store in original container in a locked storage area.

PESTICIDE DISPOSAL: For Containers Over 1 Gallon: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: For Containers 1 Gallon and Under: Do not reuse empty container. Wrap container and put in trash.

For Containers Over 1 Gallon: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by State and Local authorities.

DILUTING INSTRUCTIONS

Dilute to 0.5% SBP-1382 by adding 1 fl. oz. of the 30% concentrate to 5 fl. oz. of petroleum distillate.

Dilute to 0.25% SBP-1382 by adding 1 fl. oz. of the 30% concentrate to 11 fl. oz. of petroleum distillate.

Dilute to 0.20% SBP-1382 by adding 1 fl. oz. of the 30% concentrate to 14 fl. oz. of petroleum distillate.

Dilute to 0.10% SBP-1382 (which would be used for flying insects only) by adding 1 fl. oz. of the 30% concentrate to 29 fl. oz. of petroleum distillate.

Order Code
OC 520

FOR USE IN ULV MECHANICAL AEROSOL GENERATORS IN LEGO MINI ULV OR MICRO GEN: Apply undiluted at the rate (14 fl. ml) of concentrate per 1,000 cu. ft. (28.3 cu. meter). Direct output from aerosol generator upward toward upper room and ceiling. Extinguish all flames in the area to be treated. All air conditioning or ventilating equipment. Vacate room before use. Leave closed for one hour after spraying. Ventilate room before re-entry.

SPACE SPRAY: To kill adult and accessible stages of insect pests: grain weevils, flour beetles, saw-toothed grain beetles, carpet beetles, Angoumois grain moths, grain mites, carpet beetle eggs. Direct output into corners, under pallets, hiding as far as possible, and then treat as a space spray upward toward ceiling of room and ceiling.

TO KILL HOUSE FLIES, MOSQUITOES, GNATS AND SPIDER MOTHS: Treat as a space spray, directing output towards ceiling of room and ceiling.

CONTACT SPRAY: Use undiluted to kill cockroaches, silverfish, spiders, fleas, crickets, centipedes, sunbugs, millipedes, beetles. Apply the spray as a coarse wet spray into all cracks in woodwork, walls, floors, beneath sinks and other areas contacting as many insects as possible.

IN HORSE STABLES: Not for application in horses with to use **FOR MECHANICAL MISTING EQUIPMENT SUCH AS THE CHALLENGER MACHINES:** For most effective results spray: operate spraying dispenser adjusted to deliver a fine mist. Use rate of 0.10% or 0.25% SBP-1382.

TO KILL FLYING FLIES, MOSQUITOES, GNATS, WASPS, & SMALL FLYING MOTHS: Close all doors and windows. Paint direct spray must be on part of a room, except at wind light sources which attract these insects into the room with the treated area. Keep the room closed for at least 15 min. the room before re-entry. Repeat as necessary.

TO KILL CRAWLING INSECTS: Apply spray to produce fan spray particles and use either 0.10% or 0.50% SBP-1382.

TO KILL COCKROACHES, EARWIGS, GRAIN MITES, SOWBI SILVERFISH, CRICKETS, FLEAS, CENTIPEDES AND GRASSHOPPERS: Adult and accessible stages of centipedes, flour beetles, saw-toothed grain beetles, silverfish beetles, carpet weevils, Angoumois grain moths, and meal mites, or spray thoroughly into hiding places in cracks, crevices,

DIRECTIONS FOR USE

FOR USE IN ULV MECHANICAL AEROSOL GENERATORS SUCH AS THE LECD MINI ULV OR MICRO GEN. Apply undiluted at the rate of 0.5 fl. oz. (14.8 ml) of concentrate per 1,000 cu. ft. (28.3 cu. meters) of space. Direct output from aerosol generator upward toward upper corners of room and ceiling. Extinguish all flames in the area to be treated. Shut off all air conditioning or ventilating equipment. Vacate room before application. Leave closed for one hour after spraying. Ventilate room thoroughly before re-entry.

SPACE SPRAY: To kill adult and accessible stages of insect pests of stored foods: grain weevils, flour beetles, saw-toothed grain beetles, cigarette beetles, Tribolium grain moths, grain mites, carpet beetles and spider beetles. Direct output into corners, under pallets, etc. as many insects as possible, and then treat as a space spray upward toward upper corners of room and ceiling.

TO KILL HOUSE FLIES, MOSQUITOES, GNATS AND SMALL FLYING MOTHS: Treat as a space spray directing output towards upper corners of room and ceiling.

CONTACT SPRAY: Use undiluted to kill cockroaches, silverfish, earwigs and spiders, fleas, crickets, centipedes, scorpions, millipedes, carpet beetles. Apply the spray as a coarse wet spray into cracks and crevices and under the walls, floors, beneath sills and other insect harborage points as many insects as possible.

IN HORSE STABLES: Not for application if horses will be used for food. **FOR MECHANICAL MISTING EQUIPMENT SUCH AS THE MICRO SOL OR CHALLENGER MACHINES:** For most effective results against flying insects, coarse spray dispenser adjusted to deliver a fine mist. For flying insects use either 0.10% or 0.25% SBP-1382.

TO KILL HOUSE FLIES, MOSQUITOES, GNATS, WASPS, HORNETS, AND SMALL FLYING MOTHS: Close all doors and windows. Point nozzle upward, direct spray mist to all parts of the room, especially windows and other wall spaces which attract these insects. Fill the room with mist, then leave the treated area. Keep the room closed for at least 15 minutes. Ventilate the room before re-entry. Repeat as necessary.

TO KILL CRAWLING INSECTS: Adjust spray to produce large wet mist type spray particles and use either 0.25% or 0.50% SBP-1382.

TO KILL COCKROACHES, EARWIGS, GRAY MITES, SOWBUGS, SPIDERS, SILVERFISH, CRICKETS, FLEAS, CENTIPEDES AND GRAIN INSECTS: Adult and accessible stages of confused flour beetles, red flour beetles, saw-toothed grain beetles, shiny spider beetles, carpet beetles, grain weevils, Tribolium grain moths, Indian meal moths, cigarette beetles. Spray thoroughly into hiding places such as cracks, crevices, moist areas

openings around pipes and sinks, under refrigerators, baseboards, storage areas and other insect harborage. Spray directly on insects where possible. Repeat as necessary.

TO KILL WASPS AND HORNETS: Contact application should be made in late evening when insects are at the nest. Spray liberally into and around nest openings, contacting as many insects as possible. Repeat as necessary.

TO KILL ANTS: Spray trails, nests and points of entry. Spray on ants where possible. Repeat as necessary.

THERMAL APPLICATIONS INDOORS: Use 0.20% SBP-1382 for the control of house flies, mosquitoes and gnats in warehouses, restaurants and industrial institutions. Shut off ventilating systems, air ducts, air conditioning equipment and close off rooms or areas to be treated. Extinguish all flames and pilot lights. Apply as a dry fog at the rate of 1-1 1/2 fl. oz. (29.3 ml) per 1,000 cu. ft. (28.3 cu. meters) of space. Direct output of thermal applicator toward the upper corners of the room and along the ceiling. Close off room for at least one hour. Do not remain in treated areas. Ventilate the area before re-entry.

THERMAL APPLICATION OUTDOORS: For relief on in areas free from flies, mosquitoes, and gnats in yards, patios, around swimming pools, public areas, camp sites, drives and horse stables, and in small area applications.

Use thermal applicator at least five feet from any objects, people, plants and shrubbery. Fog mixture of fog. Apply at a rate of 5 fl. oz. of 0.20% SBP-1382 formulation per acre which is the equivalent of 1 fl. oz. per 1,000 cu. ft. Fog only when there is no breeze or the wind velocity is less than three miles per hour. The ideal time is generally early in the morning when the wind dies down and the air temperature and ground temperature are approximately the same. Under these conditions the fog will remain in the treated area for a longer time. Apply fog while moving away from treated area. Avoid inhalation of the fog. Do not enter the treated area until the fog has dissipated. Repeat application as necessary.

AVOID wetting of asphalt tile, shingles, rubbers and plastic materials. DO NOT saturate carpeting, furniture or draperies during application.

WARRANTY STATEMENT

Our recommendations for use of this product are based upon our best knowledge and to be reliable. The use of this product beyond the control of the manufacturer is no guarantee, expressed or implied, is made as to the effects of such use or the results to be obtained if applied in accordance with directions or established safe practice. The buyer must assume all responsibility, including injury or damage resulting from its misuse as well as its combination with other materials.
