Directions for Use

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Passport is a "one-step" disinfectant-cleaner-deodorant-mildewstat which has been proven effective under the adverse conditions of both a 5% organic soil load and hard water (up to 400 ppm) when diluted 4 oz./gallon. Passport contains a specific ratio of organic and inorganic acids plus synthetic, acid-compatible detergent for removing hard water deposits and lime soap buildups when used as directed.

Apply Use-Dilution to porcelain and ceramic tiles, sinks, shower stalls, bathtubs, urinal and toilet bowl surfaces, similar fixtures and other hard (inanimate) non-porous surfaces prone to scale buildup and soap scum film. Apply with a cloth, mop, or mechanical spray device so as to thoroughly wet surfaces. For extremely soiled areas a preliminary cleaning is required. Prepare a fresh solution daily or when use solution becomes visibly dirty. Surfaces must remain wet for ten minutes.

HARD WATER DISINFECTION - CLEANING - DEODORIZING

When diluted 4 oz. (1/2 cup) per gallon and tested by the AOAC Use-Dilution Method, Passport has been proven effective in the presence of 5% blood serum (organic soil) and 400 ppm hard water against:

Pseudomonas aeruginosa      Salmonella choleraesuis      Staphylococcus aureus

DISINFECTION - CLEANING - DEODORIZING

At 3 oz. per gallon use level, Passport has been evaluated by the AOAC Use-Dilution Method in the presence of 5% blood serum and proven to be effective against a broad spectrum of gram negative and gram positive micro-organisms as represented by:

Pseudomonas aeruginosa	Staphylococcus aureus
Salmonella choleraesuis	Escherichia coli
Streptococcus pyogenes	Proteus mirabilis
