

**PRECAUTIONARY STATEMENTS  
HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**DANGER:** Highly corrosive. Cause skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Follow label and wash contaminated clothing before reuse.

**ENVIRONMENTAL HAZARDS:** This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES Permit. For guidance contact the regional office of EPA.

**PHYSICAL AND CHEMICAL HAZARDS STRONG OXIDIZING AGENT:** Strong Oxidizing Agent. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction with generation of gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not re-seal container. If possible isolate container in open air or well-ventilated area. Flood with large volumes of water if necessary.

NET CONTENTS: 4# (64 oz.)

**DIRECTIONS FOR USE**

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

**SURE SHOCK** Shock Treatment and Superchlorinator with 65% available chlorine is designed to dissolve quickly and provide a ready source of available chlorine in swimming pools. Used according to directions, **SURE SHOCK** controls algae, kills bacteria and destroys organic contaminants. If any chlorine residual is present, adding 1 oz. of **Sure Shock** per 5,000 gallons will increase the residual by approximately 1 part per million (ppm).

ALWAYS ADJUST pH BETWEEN 7.2 and 7.4  
PRIOR TO USING SURE SHOCK

**SURE SHOCK**

<b>ACTIVE INGREDIENT</b>	
Calcium Hypochlorite*	65%
<b>INERT INGREDIENT</b>	35%
*Available Chlorine	65%

**KEEP OUT OF REACH OF CHILDREN  
DANGER**

**PRACTICAL TREATMENT:** (First Aid): If swallowed feed bread soaked in milk followed by olive oil or cooking oil. Call a physician immediately. If on skin: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention. If in Eyes: Flush with cold water for at least 15 minutes. Get medical attention.

**SUPERCHLORINATION AND STABILIZED POOLS:** For pools stabilized with cyanuric acid, periodic superchlorination is necessary to provide sufficient free available chlorine to control algae, destroy unfiltered organic contaminants, minimize odors and keep your water sparkling clear.

Superchlorinate by broadcasting over a large area, mainly in the deep end of the pool, 1.0 oz. per 1,000 gallons of water. Superchlorinate every 14 days when the temperature of the water is below 80°F. Treatment every 7 days is recommended when the temperature is higher, bathing loads are heavy, pool water appears dull or hazy, unpleasant chlorine smells are present, excessive eye irritation occurs, or after heavy rains. Pool should not be entered until the chlorine residual is 1.0 - 3.0 ppm.

**SHOCK TREATMENT FOR CONTROL OF ALGAE:** If algae develops, with resulting green color and slimy feeling, shock treatment is necessary.

Broadcasting Sure Shock over a large area of the pool surface mainly at the deep end, at the rate of 12 oz. of Sure Shock per 1,000 gallons of water. If the pool sides or bottom develop algae spots, direct Sure Shock as close to the algae as possible. Note: Prolonged contact with pool surfaces may cause staining or bleaching. Immediately after treatment, thoroughly clean pool by scrubbing surface of algae growth, vacuum and cycle through filter. If necessary, repeat the treatment. Pool should not be entered until the chlorine residual is 1.0 - 3.0 ppm.

**START UP:** For initial chlorination of pool water, add 1.0 oz. Sure Shock per 1,000 gallons of pool water. Allow 45 minutes to disperse and then test the chlorine residual with a pool test kit. If below 1.0 ppm, repeat this dosage until 1.0 ppm is obtained. Pool should not be entered until chlorine residual is 1.0 - 3.0 ppm.

**WINTERIZING:** While the water is still clear and clean, prepare for long period of disuse by gradually applying 6 oz. Sure Shock per 1,000 gallons of water. Run the filter until completely dispersed. Cover the pool with a plastic pool cover and prepare the heater, pump and filter components for winter by following manufacturers' directions. When the pool cover is removed in the spring, follow Start Up directions.

**STORAGE AND DISPOSAL:** Keep product dry in tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of decomposition, isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding. Place in trash collection or disposal as approved landfill area or bury in a safe place.
