REGISTRATION DIVISION (75-767)
WASHINGTON, DC 20480

EPA REGISTRATION NO.

DATE OF ISSUANCE

45457-16

April 5, 1990

TERM OF ISSUANCE

APR 5 1990

NOTICE OF PESTICIDE: REGISTRATION
 REREGISTRATION

(Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended.)

NAME OF PESTICIDE PRODUCT

... .. 2001 Concentrated

NAME AND ADDRESS OF REGISTRANT

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

persists, get medical attention. If in Eyes: Flush with cold water for at least 15 minutes. Get immediate medical attention. If Inhaled: Remove person to fresh air. Get immediate medical attention.

CHEMICAL HAZARDS: DANGER: Strong oxidizing agent. Use only clean, dry utensils. Mix only into water. Contamination with moisture, dirt, organic matter or other chemicals (including other pool chemicals) or any other foreign matter may start a chemical reaction with generation of heat, liberation of hazardous gases and possible generation of fire and explosion. Avoid any contact with flaming or burning material, such as a lighted cigarette. Do not use Swimming Pool Sticks in any chlorinating device which has been used with any inorganic or unstabilized chlorinating compounds (e.g. calcium hypochlorite). Such use may cause fire or explosion. Do not permit sticks to contact plastic pool linings or metal objects. Do not throw sticks directly into pool.

ENVIRONMENTAL HAZARD: This product is toxic to fish. Do not contaminate lakes, ponds or streams by cleaning of equipment or disposal of wastes.

STORAGE AND DISPOSAL: Keep product dry in tightly closed container when not in use. Store in cool, dry, well-ventilated area away from heat or open flame. Do not reuse empty container. Rinse empty container thoroughly with water to dissolve all material before discarding.

Securely wrap container in several layers of newspaper and discard trash.

EMERGENCY HANDLING: In case of contamination or decomposition, do not reseal container. If possible, isolate container in open and well-ventilated area. Flood with large volumes of water. Dispose of contaminated material in an approved landfill area or bury in a safe place.

LEFT PANEL

Directions for Pool use: It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Swimming Pool concentrated pool chlorinating sticks are designed to dissolve slowly (3-7 days) providing a steady source of available chlorine to control growth of algae and effectively kill many bacteria.

For Best Results: Place Swimming Pool Sticks in feeder following manufacturer directions or in a floating dispenser or skimmer. Do not permit sticks to contact plastic pool linings or metal objects. Do not throw sticks directly into the pool. Run pump and filter until sticks are dissolved.

Startup:

1. Adjust pH to 7.2-7.4 with Swimming Pool pH Plus or Swimming Pool pH Minus.
2. Superchlorinate with calcium hypochlorite to obtain a 1-3 ppm chlorine residual. Follow label directions.
3. The next day stabilize your pool using Swimming Pool Stabilizer. Follow label directions.

Routine Care: Add one 8 ounce Swimming Pool Stick for each 10,000 gallons of water every week, or as needed, to maintain chlorine residual at 1-3ppm. Run pump and filter until sticks are dissolved. Maintain pH between 7.2-7.6, total alkalinity 90-125 ppm and calcium hardness above 200 ppm. Test with a reliable test kit. Make necessary adjustments with the appropriate pool care product(s). Superchlorinate weekly with calcium hypochlorite to burn out organic material and to keep water sparkling clear.

In Case of: Algae, colored water, unpleasant odors, burning eyes, excess bather load, heavy rains and winds, or high temperatures, shock treat your pool using calcium hypochlorite. Follow label directions. An alternate method is to add 2 Swimming Pool sticks in the skimmer for each 10,000 gallons of water. Run pump and filter until sticks are dissolved. If algae are visible scrub pool surfaces and vacuum. Repeat treatment the following day if necessary. Do not enter pool until chlorine residual is 1-3 ppm.

To Determine Pool Capacity In U.S. Gallons:

Rectangular-multiply length(ft.) x width (ft.) x average depth (ft.) x 7.5

Round-multiply diameter (ft.) x diameter (ft.) x average depth (ft.) x 5.9

Oval-multiply long diameter (ft.) x short diameter (ft.) x average depth (ft.) x 5.9
