

**Concentrated
Pool Chlorinating**

GRANULAR

For use in pools, spas and hot tubs

Active Ingredients:
Sodium Dichloro-s-
Triazinetrione Dihydrate...99%
Inert Ingredients 1.0%
Available Chlorine 55%
EPA Reg. No. 45458-20
EPA Est. No. 45458-OH-01

**KEEP OUT OF REACH OF CHILDREN
DANGER**
See First Aid and Additional
Precautionary Statements On Back Panel.

ACCEPTED
MAY 28 2004
Under the Federal Insecticide, Fungicide, and
Rodenticide Act as amended, for the
pesticide, registered under
EPA Reg. No. 45458-20

NET CONTENTS: 2 LBS.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling. This product is designed to dissolve quickly and completely. This product provides a steady source of available chlorine to control the growth of algae and effectively kill many harmful bacteria.

READ ALL PRECAUTIONARY STATEMENTS BEFORE USE.

METHOD OF APPLICATION:

Broadcast the product evenly over a wide area in the deepest part of the pool with the water circulating.

WATER BALANCE:

Maintain pH at 7.2 to 7.6 total alkalinity between 90 and 125 parts per million for swimmer comfort and crystal clear water. Test frequently using a reliable test kit and make necessary adjustments promptly with appropriate products.

FOR POOLS:

Routine Chlorination: Broadcast 3 ounces of this product per 10,000 gallons of pool water every other day or as often as needed to maintain chlorine residual at 1-3 ppm. Pool should not be entered until the chlorine residual is 1-3 ppm as measured with a reliable test kit.

SHOCK TREATMENT:

As a preventative treatment you should shock treat your pool once per week to prevent pool problems. Shock treat weekly with Maintain Pool Pro Shock Treatment or equivalent to kill bacteria, control algae, burn out organic material and to keep water sparkling clear. Follow label instructions. An alternative method is to add 21 ounces of this product per 10,000 gallons of water. Follow method of application directions on this label. If algae is visible, scrub pool surface and vacuum. Repeat treatment the following day if necessary. Do not reenter pool until chlorine residual is 1-3 ppm.

FOR SPAS AND HOT TUBS:

Chlorinate: Add 1/2 oz of this product per 500 gallons of water to the water prior to entry. Wait 5 minutes then check chlorine residual. Residual chlorine must read 2 to 3 ppm. If it does not, add additional dosages until it does. Once the chlorine residual is established in the 2 to 3 ppm range, the spa or hot tub may be entered.

Maintain: This product should be added daily or as necessary to maintain 2 to 3 ppm residual chlorine. Frequent checks should be made of the chlorine residual using a reliable test kit. This product should be broadcast over the surface of the water and allowed at least 5 minutes mix time before sampling.

Note: Heavy bather usage or the use of oils or lotions may increase the chlorine demand of the spa or hot tub resulting in the need for more frequent checks of the chlorine residual.

Superchlorination or Shock Treatment: It is good practice to superchlorinate each 2 to 4 weeks. To superchlorinate, add 1oz. of this product for each 500 gallons of water. Thoroughly clean spa, vacuum and cycle through filter. Resume program when chlorine residual reads 2 to 3 ppm.

Item #4-1502

Sold By:
Baleco International Inc.
Cincinnati, OH 45211

PRECAUTIONARY STATEMENTS**HAZARDS TO HUMANS AND DOMESTIC ANIMALS:****DANGER: Highly Corrosive.**

• Causes irreversible eye damage and skin burns. • May be fatal if inhaled or absorbed through the skin. • Do not breathe dust, vapor or spray mist. • Irritating to nose and throat. • May be fatal if swallowed. • Do not get in eyes, on skin or clothing. • Wear goggles, face shield, protective clothing and rubber gloves when handling. • Wash hands thoroughly with soap and water after handling and before eating, drinking or using tobacco. • Remove contaminated clothing and wash clothing before reuse.

1. Use only clean, dry utensils.
2. Add only into water.
3. **DO NOT** use this product in any chlorinating device which has been used with any inorganic or unstabilized chlorinating compounds (like calcium hypochlorite). Such use may cause fire or explosion.
4. Contamination with moisture, dirt, organic matter, or other chemicals may start a chemical reaction with generations of heat, liberation of hazardous gases and possible fire and/or explosion.
5. Avoid any contact with a flaming or burning material.

ENVIRONMENTAL HAZARD:

This pesticide is toxic to fish and aquatic organisms.

FIRST AID	
Have the product container or label with you when calling a poison control center or doctor or going for treatment.	
If in eyes	<ul style="list-style-type: none"> • Hold eyes open and rinse slowly and gently with water for 15-20 minutes. • Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. • Call a poison control center or doctor for treatment advice.
If inhaled	<ul style="list-style-type: none"> • Move person to fresh air. • If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. • Call a poison control center or doctor for further treatment advice.
If on skin or clothing	<ul style="list-style-type: none"> • Take off contaminated clothing. • Rinse skin immediately with plenty of water for 15-20 minutes. • Call a poison control center or doctor for treatment advice.
If swallowed	<ul style="list-style-type: none"> • Call poison control center or doctor immediately for treatment advice. • Have person sip a glass of water if able to swallow. • Do not induce vomiting unless told to do so by the poison control center or doctor. • Do not give anything by mouth to an unconscious person.

STORAGE AND DISPOSAL

Keep product dry in a tightly closed container when not in use. Keep away from heat or open flame. Store in cool, dry, well-ventilated area.

If empty: Do not reuse this container. Place in trash or offer for recycling if available. If partly filled: call your local solid waste agency or 1-800-CLEANUP for disposal instructions.

Never place unused product down any indoor or outdoor drain.

EMERGENCY HANDLING:

In case of contamination or decomposition:

1. **DO NOT** re-seal container.
2. If possible, isolate container in open and well-ventilated area.
3. Flood with large amounts of water.
4. Dispose of contaminated material in an approved landfill area.
