

MAY 19 1988

Mr. Pat Quinlan
Insecta, Inc.
25 SE. 7th Street
Deerfield Beach, FL 33443

Dear Mr. Quinlan:

Subject: Insecta
EPA Registration No. 45600-1
Your Submission Dated June 20, 1988

The amendment referred to above, submitted in connection with registration under section 3(c)(7)(A) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), is acceptable provided that you:

1. Submit/cite all data required for registration/reregistration of your product under FIFRA section 3(c)(5) when the Agency requires all registrants of similar products to submit such data.
2. Make the labeling changes listed below before you release the product for shipment bearing the amended labeling:
 - a. At the next printing of the label, or within 6 months, please delete the "disposal of wastes" sentence under the Environmental Hazards and replace with "Do not contaminate water when disposing of equipment washwaters."
 - b. Add the following bee caution to the label:

This product is extremely toxic to bees exposed to direct treatment or residues on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds if bees are visiting the treatment area.

3. Submit five (5) copies of your final printed labeling before you release the product for shipment.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product bearing the amended labeling constitutes acceptance of these conditions.

This will acknowledge receipt of your Confidential Statement of Formula. This information is acceptable and will be placed in our file for your product.

A stamped copy of the label is enclosed for your records.

Sincerely yours,

Dennis H. Edwards, Jr.

456

Do not use in food areas of food handling establishments, milkrooms, restaurants or other locations where food is commercially prepared or processed.

If applied in home, cover all food processing surfaces and utensils or wash thoroughly before reuse. Cover exposed food. Do not apply to surfaces which actually contact food during preparation, or mangers, feed troughs, etc.

STATEMENT OF PRACTICAL TREATMENT

If swallowed: Call a physician or Poison control center, drink plenty of water.

If inhaled: As with any freshly coated surface get plenty of fresh air. If on skin: Wash with water.

If in eyes: flush with plenty of water. Get medical attention if irritation persists.

Note to Physician: Chlorpyrifos is a cholinesterase inhibitor. Treat symptomatically. Atropine, only by injection, is the preferable antidote.

ENVIRONMENTAL HAZARDS

This product is toxic to fish, birds and other wildlife. Do not contaminate water by cleaning of equipment or disposal of wastes. Do not apply directly to water. Apply this product only as specified on this label.

PHYSICAL HAZARDS

Should not be mixed with water or paint solvents, not diluted in any manner.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. All loose paint, whitewash, dirt, mildew, oil and other contaminants must be removed to insure a clean surface. This product is supplied ready to use after stirring thoroughly. For interior home use, this product should be applied by brush or rolled on target areas as stated on the front part of this label in the form of a band a few inches in width to obtain an even coat covering approximately 425 s.f. per gallon. For uses other than interior home application, apply with brush, roller or spray. Wash brush, roller or spraying equipment thoroughly with soap and water after use. As contact between the insect and coated surface is necessary, any time that the latter becomes covered with dust or dirt, the coated surface should be washed with clear water in order to re-establish maximum possible contact.

BACKLABEL CONTINUED

GENERAL

Home Use: Use to control crawling insects as well as some flying insects in target areas as stated on the front part of this label, of interior or exterior surfaces of homes.

Agricultural, Commercial
and Industrial Use:

Use to control crawling insects as well as some flying insects on interior and exterior surfaces of buildings including horse barns, dairy barns, milking parlors, animal hospitals, kennels, manufacturing plants, warehouses, offices, hotels, motels, restaurants, theatres, etc.

Non-Bearing Fruit Trees:

Use to control crawling insects as well as some flying insects by applying Insecta from ground level to a maximum of 3 feet up the trunk of non-bearing fruit trees which include apples, ~~cherries~~, cherries, citrus fruits, peaches, pears, plums and tree nuts. Non-bearing fruit trees are defined as those which will not bear fruit within twelve months following the application of Insecta.

Kills by contact:

flies, mosquitos, spiders, cockroaches, ants, etc. Dries quickly and rinses easily with water. Covers approximately: 425 sq. ft. per gallon. Allow to dry for several days before washing. Coating must dry for several days before maximum insect control occurs.

STORAGE AND DISPOSAL

Storage: Store away from freezing temperatures. Disposal: Do not reuse empty container. Wrap container and put in trash collection.
