See back panel for additional precautionary statements.

VER. 1.1

Do not use in food areas of food handling establishments, milkrooms, restaurants or other locations where food is commercially prepared or processed.

If applied in home, cover all food processing surfaces and utensils or wash thoroughly before reuse. Cover exposed food. Do not apply to surfaces which actually contact food during preparation, or mangers, feed troughs, etc.

#### STATEMENT OF PRACTICAL TREATMENT

If swallowed: Call a physician or Poison control center, drink plenty of water.

If inhaled: As with any freshly coated surface get plenty of fresh air. If on skin: Wash with water.

If in eyes: flush with plenty of water. Get medical attention if irritation persists.

Note to Physician: Chlorpyrifos is a cholinesterase inhibitor. Treat symptomatically. Atropine, only by injection, is the preferable antidote.

#### ENVIRONMENTAL HAZARDS

This product is toxic to fish, birds and other wildlife. Do not contaminate water by cleaning of equipment or disposal of wastes. Do not apply directly to water. Apply this product only as specified on this label.

#### PHYSICAL HAZARDS

Should not be mixed with water or paint solvents, not diluted in any manner.

#### DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. All loose paint, whitewash, dirt, mildew, oil and other contaminants must be removed to insure a clean surface. This product is supplied ready to use after stirring thoroughly. For interior home use, this product should be applied by brush or rolled on target areas as stated on the front part of this label in the form of a band a few inches in width to obtain an even coat covering approximately 425 s.f. per gallon. For uses other than interior home application, apply with brush, roller or spray. Wash brush, roller or spraying equipment thoroughly with soap and water after use. As contact between the insect and coated surface is necessary, any time that the latter becomes covered with dust or dirt, the coated surface should be washed with clear water in order to re-establish maximum possible contact.

## BACKLABEL CONTINUED

GENERAL

Home Use: Use to control crawling insects as well as some flying insects in target areas as stated on the front part of this label, of interior or exterior surfaces of homes. These include roaches, ants, spiders, flies, mosquitoes, millipedes, ticks, gnats, palmetto bugs, silverfish, earwigs, crickets, ~~scorpions~~ scorpions and black widow spiders.

Agricultural, Commercial  
and Industrial Use:

Use to control crawling insects as well as some flying insects on interior and exterior surfaces of buildings including horse barns, dairy barns, milking parlors, animal hospitals, kennels, manufacturing plants, warehouses, offices, hotels, motels, restaurants, theatres, etc.

Kills by contact:

Dries  
quickly and rinses easily with water. Covers approximately:  
425 sq. ft. per gallon. Allow to dry for several days before  
washing. Coating must dry for several days before maximum  
insect control occurs.

STORAGE AND DISPOSAL

Storage: Store away from freezing temperatures. Disposal: Do not reuse empty container. Wrap container and put in trash collection.
