Front Panel

## Kills Crawling and Flying Insects

Kills cockroaches for one year when exposed to treated surfaces  
Kills flying insects alighting on treated surfaces for up to 18 months

# INSECTA

## CLEAR Interior/Exterior

**Home Use:** For use as a crack and crevice and spot treatment on non-food contact surfaces around points of entry including underneath the sink, in back of stoves and refrigerators, on and along baseboards, around windows and doors, back of cabinets and desks in homes. Do not use for broadcast interior home application such as entire walls, ceilings and floors.

**Industrial, Commercial and Agricultural Use:** For use on non-food contact surfaces such as walls, ceilings, masonry and concrete, loading and unloading docks and garbage disposal areas of buildings including apartments, offices, warehouses, hospitals, hotels, motels, schools, restaurants, theaters, horse barns, dairy barns, milking parlors, chicken houses, animal hospitals, kennels, in sewer manholes, and also for control of fire ants and spiders in and around electrical equipment.

Active Ingredients: Chlorpyrifos (0,0-Diethyl 0-(3,5,6-trichloro-2pyridinyl) phosphorothioate	0.86%
Inert Ingredients:	99.14%
Total:	100.00%

Net Weight: 1 gallon (3.785L)

**KEEP OUT OF REACH OF CHILDREN  
CAUTION**

See back panel for additional precautionary statements

**ACCEPTED**  
APR 17 1997

Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the pesticide registered under EPA Reg. No. 45600-1

## SHAKE WELL BEFORE USE

Easy Water Clean-up

Product of U.S.A.

Product No.: \_\_\_\_\_, UPC Code: \_\_\_\_\_

## Precautionary Statements

### Hazards To Humans and Domestic Animals

### CAUTION

Harmful if swallowed or absorbed through skin. Avoid breathing vapors while product is wet. Provide ventilation of area during application. Avoid contact with eyes, skin and clothing. In case of contact, immediately flush eyes and skin with plenty of water. Wash thoroughly with soap and water after handling. If applied in home, cover all food processing surfaces and utensils or wash thoroughly before reuse. Cover exposed food. Do not apply to surfaces which actually contact food during preparation, or to mangers and feed troughs.

### Statement of Practical Treatment

If in eyes: Flush with plenty of water. Get medical attention if irritation persists.

If inhaled: As with any freshly treated surface, get plenty of fresh air.

If on skin or clothing: Remove contaminated clothing. Wash skin with soap and warm water. Get medical attention if irritation persists.

If swallowed: Call a physician or Poison Control Center and drink plenty of water.

Note to Physician: Chlorpyrifos is a cholinesterase inhibitor. Treat symptomatically. Atropine, only by injection, is the preferable antidote.

### Environmental Hazards

This product is toxic to fish, birds and other wildlife. Do not contaminate water by disposal of equipment washwaters. Do not apply directly to water. Apply this product only as specified on this label.

395

## DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Insure that all surfaces are clean and dry prior to applying this product. Each gallon covers approximately 500 square feet. This ready-to-use product should be stirred thoroughly prior to application. Wear rubberized gloves during application. Apply with brush, roller or handled pad applicator, or by course, low pressure spray. For best results, use without dilution. If necessary, dilute with up to 5% water.

**CRACK AND CREVICE TREATMENT:** Apply Insecta as a course, low pressure (20 PSI or less) spray with equipment capable of delivering a pinstream of insecticide directly into openings leading to voids and hollow spaces in walls, equipment legs and bases, or at points that occur between different elements of construction or especially where equipment joins floors and walls. Use an applicator fitted with needle injector or equipment capable of delivering a pinstream of insecticide. Use equipment with plastic rather than rubber hoses because the solvents in the insecticide may cause collapse of the rubber. Prior to application, de-energize equipment and allow time for solvent to evaporate before starting motors or placing on "ON" position. Do not apply Insecta on or near flames or heated surfaces.

**FOOD MUST BE REMOVED OR COVERED DURING TREATMENT: SPOT TREATMENT** controls cockroaches, ants, crickets, silverfish and aids in the control of pantry pests in and around both food and non-food areas. Apply Insecta with a 3 in to 4 in brush, roller or handled pad applicator to localized areas where these pests have been seen or are suspected of hiding or entering. Apply only enough to wet the surface. Avoid runoff. Do not allow the insecticide to contact food or food processing surfaces. Areas to be treated include around plumbing and other utility installations, dark corners and closets, along and on baseboards, moldings, around doors, windows, ventilators and other openings. Apply adjacent to tin paneling or other material loosely attached to walls. Completely band the underside of work tables and storage shelving but never on the exposed work storage surface. Remove all drawers and band the three sides but never the interior or front. Floor drains, garbage rooms and locker rooms should be included in treatment. Treated surfaces should not be washed or cleaned for 36 hours after application.

**FOOD HANDLING ESTABLISHMENTS:** (Places other than private residences in which exposed food is held, processed, prepared or served) including, but not limited to bars, restaurants, food stores, bakeries, bottling plants, canneries and grain mills. Application shall be limited to (Brush-on) spot treatment and/or crack and crevice treatment. For crack and crevice treatment, equipment capable of delivering a pinstream of insecticide should be used.

FOR CONTROL OF FIRE ANTS, spiders, wasps and other insects nesting or harboring in electrical equipment including, but not limited to, electrical transformer boxes, telephone switch gear boxes, air conditioner cabinets, traffic signal and light standards, pump houses, around swimming pool equipment, underground equipment vaults, field radar and navigation equipment installations. Apply this product to the interior and exterior of the corners, joint access doors and panels, and sides of equipment housing. Application to the interior of such installation must be made when equipment is not in operation and surfaces must be dry before placing equipment back in service. Do not apply to electrical connectors or components. Product may be applied by coarse, low pressure spray or suitable brush or applicator. Shop performed applications (before equipment is installed) may be made via coarse spray using conventional airless spray equipment. Persons applying product by high pressure spray must wear chemical resistant gloves, a respirator approved by NIOSH for organic chemical vapors, goggles and long-sleeved clothing.

TREATMENT OF SEWER MANHOLES: (For control of roaches). Apply product on manhole walls. Product may be applied via coarse spray using conventional airless spray equipment or by applying with suitable brush or roller. Persons applying product in manholes must wear chemical resistant gloves, a respirator approved by NIOSH for organic chemical vapors, goggles and long-sleeved clothing. Do not discharge spray or unused material directly into sewer system. Do not apply product within 36 hours of predicted heavy rainfall.

ATTENTION: Dries quickly and rinses easily with water. Allow to dry for several days before washing. Wash brush, roller, applicator or spraying equipment thoroughly with soap and water after use. As contact between the insect and the treated surface is necessary, any time that the latter becomes coated with dust or dirt, the treated surface should be washed with water in order to re-establish maximum possible contact. INSECTA applied on exposed glass, glazed tile, metal or other non-porous surfaces may dry leaving a light film.

KILLS BY CONTACT: Roaches, ants, spiders, flies, mosquitoes, millipedes, ticks, gnats, palmetto bugs, silverfish, earwigs, crickets, fire ants, scorpions and black widow spiders.

### Storage and Disposal

Do not contaminate water, food or feed by storage and disposal. Store away from freezing temperatures. Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. For disposal of container, triple rinse (or equivalent), then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.
