SUBJECT Application for Pesticide Notification – Addition of Winter Moths
Insecta Liquid
EPA Reg No 45600 20
Application Dated February 2 2007

Dear Mr /Ms Quinlan

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration Notice (PRN) 98-10 for the product above. The Registration Division (RD) has conducted a review of this request for its applicability under PRN 98 10 and finds that the actions requested fall within the scope of PRN 98-10. The label submitted with the application has been stamped 'Notification' and will be placed in our records.

If you have any questions please me directly at 703-305 6249 or Terri Stowe of my staff at 703 305-6117

Sincerely

Linda Arrington

Precautionary Statements

Hazards To Humans and Domestic Animals

CAUTION

Harmful if swallowed inhaled or absorbed through the skin Causes moderate eye irritation Do not breathe vapors or spray mist Avoid contact with eyes skin or clothing Wash thoroughly with soap and water after handling

First Aid

If in eyes Hold eye open and rinse slowly and gently with water for 15-20 minutes Remove contact lenses if present after the first 5 minutes then continue rinsing eye Call a poison control center or doctor for treatment advice

If inhaled Move person to fresh air If person is not breathing call 911 or an ambulance then give artificial respiration preferably by mouth-to mouth, if possible Call a poison control center or doctor for further treatment advice

If on skin or clothing Take off contaminated clothing Rinse skin immediately with plenty of water for 15-20 minutes Call a poison control center or doctor for treatment advice

If swallowed Call a poison control center or doctor immediately for treatment advice Have a person sip a glass of water if able to swallow Do not induce vomiting unless told to do so by the poison control center or doctor Do not give anything by mouth to an unconscious person

Have the product container or label with you when calling a poison control center or doctor or going for treatment

Note to Physician None

Environmental Hazards

This product is toxic to fish, birds and other wildlife. Do not contaminate water when cleaning equipment or by disposing of equipment washwaters. Do not apply directly to water. Apply this product only as specified on this label.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Provide ventilation of area during application. Insure that all surfaces are clean and dry prior to applying this product. Each gallon covers approximately 500 square feet. This ready-to-use product should be stirred thoroughly prior to application. Wear rubberized gloves during application. Apply with brush, roller or handled pad applicator or by coarse low pressure spray. For best results use without dilution. If necessary dilute with up to 5% water.

Do not apply this product in occupied patient rooms or in any rooms/areas while occupied by patients, the elderly or infirm. Do not apply in classrooms when in use. Do not apply to institutions (including libraries, sports facilities, etc.) in the immediate area when occupants are present. Do not use in food/feed areas of food/feed handling establishments, restaurants, or other areas where food/feed is commercially prepared or processed. Do not use in serving areas while food is exposed or facility is in operation. Serving areas are the areas where prepared foods are served such as dining rooms but excluding areas where food may be prepared or held. In the home, all food processing surfaces and utensils should be covered during treatment or thoroughly washed before use. Exposed food should be covered or removed.

Non food/feed areas where this product can be applied are areas such as garbage rooms, lavatories, floor drains (to sewers), offices, locker rooms, machine rooms, boiler rooms, garages, mop closets and storage (after canning or bottling).

CRACK AND CREVICE TREATMENT Apply Insecta as a coarse low pressure (20 PSI or less) spray with equipment capable of delivering a pinstream of insecticide directly into openings leading to voids and hollow spaces in walls, equipment legs and bases, or at points that occur between different elements of construction or especially where equipment joins floors and walls. Use an applicator fitted with needle injector or equipment capable of delivering a pinstream of insecticide. Use equipment with plastic rather than rubber hoses because the solvents in the insecticide may cause collapse of the rubber. Prior to application, de-energize equipment and allow time for solvent to evaporate before starting motors or placing on 'ON' position. Do not apply Insecta on or

))
near flames or heated surfaces Greatest residual efficacy is achieved when Insecta is applied over painted sealed or metal surfaces

SPOT TREATMENT controls cockroaches ants crickets silverfish and aids in the control of pantry pests Apply Insecta with a 3 in to 4 in brush roller or handled pad applicator to localized areas where these pests have been seen or are suspected of hiding or entering Apply only enough to wet the surface Avoid runoff Do not allow the insecticide to contact food or food processing surfaces To achieve maximum residual efficacy whenever possible apply Insecta over painted sealed or metal surfaces Areas to be treated include around plumbing and other utility installations dark corners and closets along and on baseboards moldings around doors windows ventilators and other openings Apply adjacent to tin paneling or other material loosely attached to walls Completely band the underside of work tables and storage shelving but never on the exposed work storage surface Remove all drawers and band the three sides but never the interior or front Floor drains garbage rooms and locker rooms should be included in treatment Treated surfaces should not be washed or cleaned for 36 hours after application

FOR CONTROL OF FIRE ANTS spiders wasps and other insects nesting or harboring in electrical equipment including but not limited to electrical transformer boxes telephone switch gear boxes air conditioner cabinets traffic signal and light standards pump houses around swimming pool equipment underground equipment vaults field radar and navigation equipment installations Apply this product to the interior and exterior of the corners joint access doors and panels and sides of equipment housing Application to the interior of such installation must be made when equipment is not in operation and surfaces must be dry before placing equipment back in service Do not apply to electrical connectors or components Product may be applied by coarse low pressure spray or suitable brush or applicator Shop performed applications (before equipment is installed) may be made via coarse spray using conventional airless spray equipment

TREATMENT OF SEWER MANHOLES (For control of roaches) Apply product on painted or sealed manhole walls Product may be applied via coarse spray using conventional airless spray equipment or by applying with suitable brush or roller Apply no more than 48 ounces (3 pints) of product to each manhole Do not discharge spray or unused material directly into sewer system Do not apply product within 36 hours of predicted heavy rainfall

FOR CONTROL OF GYPSY MOTHS (How to use instructions)

For use on trees To control instar 1 caterpillars application must be done before they move off of the egg masses Put one wrap of 12 inch wide burlap around the tree Fasten with two pieces of twine with one placed in the center around the burlap and other near the top of the burlap Apply a thorough coating of this product onto the burlap This product is applied with a brush or a coarse spray from a trigger pump spray bottle When the caterpillars grow to their instar 3 stage remove the top twine to allow the burlap to fold over the middle twine

For Use On Vertical Structures To control caterpillars on flat surfaces apply 12 inch wide burlap to the bottom of the surface or to a board along the bottom of the surface and apply a thorough coat of this product The burlap should be tacked in the middle and on the top When the caterpillars grow to their instar 3 stage remove the top tacks to allow the burlap to fold over the middle tacks

Your local nursery will help with the instar timing in your area
After the gypsy moths pupate remove the burlap and discard

ATTENTION Dries quickly and rinses easily with water Allow to dry for several days before washing Wash brush, roller applicator or spraying equipment thoroughly with soap and water after use As contact between the insect and the treated surface is necessary any time that the latter becomes coated with dust or dirt the treated surface should be washed with water in order to re establish maximum possible contact
INSECTA applied on exposed glass glazed tile metal or other non-porous surfaces may dry leaving a light film

KILLS BY CONTACT Cockroaches ants spiders flies mosquitoes millipedes ticks gnats palmetto bugs silverfish earwigs crickets fire ants gypsy moths winter moths scorpions and black widow spiders
