.....

**Sequential Treatment:** For sugar beets grown under sprinkler irrigation, apply Ro-Neet 6E and incorporate according to Ro-Neet label directions. Then apply NORTRON Flowable to the soil surface and irrigate, applying 1/2 to 1 inch of water. Before use, read Ro-Neet 6E label for additional information and precautions.

**DOSAGE TABLE**

| Soil Texture                                                                                               | Rate of NORTRON Flowable Per Acre <sup>1</sup> |                    | Rate of Ro-Neet 6E Per Acre <sup>1</sup> |                    |
