

**BETANEX® Herbicide**

EPA Reg. No. 45639-86

**Directions for Use for Micro-Rate Applications to Sugarbeets****General Information**

Multiple Micro-rate applications of Betanex Herbicide in tank mixtures with reduced rates of UpBeet™, Stinger™, and/or modified seed oils and/or basic blends (as referenced in the 1999 North Dakota Weed Control Guide) may be applied by air or ground equipment to sugar beets to control early germinating weeds in the states of North Dakota and Minnesota only. The rate of Betanex must not exceed 0.5 pint/acre (broadcast application) when in combination with these spray adjuvants. The use of wetting agents or spray adjuvants with conventional rates (4.5 to 7.5 pints/acre) or multiple low rate (1.5 to 4.5 pints/acre) applications of Betanex is prohibited on the Betanex master label. Favorable climatic conditions (good conditions for plant growth and development) are essential for adequate weed control. All other use precautions and restrictions on the Betanex Herbicide master label must be followed.

**Directions for Using Micro-rate Multiple Applications of Betanex Herbicide:**

Apply Betanex Herbicide in broadcast applications only at a rate of 0.5 pint/acre in tank mixture with the tank mix partners selected, in 10 to 20 gallons of water/acre for ground applications, or 5 to 15 gallons of water/acre for aerial applications. Use the minimum rate recommended on the tank mix partner label, or a reduced rate of the tank mix partner(s), at the discretion of the grower or applicator as permitted under FIFRA. [Minimum label rate for UpBeet = 0.5 fl oz/acre; for Stinger = 4.0 fl oz/acre.] Use modified seed oils and/or basic blends (as referenced in the 1999 North Dakota Weed Control Guide) at a finished spray concentration of 1.5% v/v or 1 pt/acre. A minimum of three sequential applications should be utilized. Accurate timing is essential; make initial application immediately after weeds emerge, and make repeat applications on 5-day intervals. If weed control is not adequate due to climatic conditions, spray coverage or other factors, return to conventional application rates as recommended on the Betanex Herbicide master label. This product can be mixed with UpBeet, Stinger, and/or modified seed oils and/or basic blends (as referenced in the 1999 North Dakota Weed Control Guide) for use on sugarbeets in accordance with the most restrictive of label limitations and precautions. No label dosage rates should be exceeded. This product cannot be mixed with any product containing a label prohibition against such mixing.

**Use Precautions for Micro-rate applications: (see Betanex master label for additional use precautions)**

Not all weeds will be adequately controlled, even with favorable climatic conditions. Conventional rates of Betanex Herbicide and/or hand labor may be required if multiple micro-rate applications do not adequately control weeds. Plugging of spray nozzles may be encountered due to the potential for formation of a precipitate in the spray solution that is often associated with micro-rate applications. AgrEvo will not be responsible for any nozzle plugging that may occur with the use of multiple micro-rate applications. Modified seed oils and/or basic blends (as referenced in the 1999 North Dakota Weed Control) must not be added if the Betanex rate exceeds 0.5 pint/acre broadcast, as the addition of modified seed oils and/or basic blends (as referenced in the 1999 North Dakota Weed Control Guide) could increase the possibility of clogging at dosage rates greater than 0.5 pint/acre.

**IMPORTANT: READ BEFORE USE**

By using this product, user or buyer accepts the following conditions, warranty, disclaimer of warranties and limitations of liability. CONDITIONS: The directions for use of this product are believed to be adequate and should be followed carefully. However, because of extreme weather conditions and soil conditions, manner of use and other factors beyond AgrEvo USA Company's control, it is impossible for AgrEvo USA Company to eliminate all risks associated with the use of this product. As a result, crop injury or ineffectiveness is always possible. All such risks shall be assumed by the user or buyer. DISCLAIMER OF WARRANTIES: THERE ARE NO WARRANTIES, EXPRESS OR IMPLIED, OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR OTHERWISE, WHICH EXTEND BEYOND THE STATEMENTS MADE ON THIS LABEL.
