33 5% 100 0%

EPA Reg. No. 45639-88

PRECAUCION AL USUARIO: Si usted no lee ingles, no use este producto hasta que el etiqueta haya sido explicado ampliamente.

## KEEP OUT OF REACH OF CHILDREN **CAUTION - PRECAUCION** STATEMENT OF PRACTICAL TREATME

Obtain medical attention immediately. See note to

physician.

IF INMALED:

Remove to fresh air, support respiration, and seek

medical advice.

IF IN EYES: Immediately flush with plenty of water. Get

medical attention if irritation persists.

IF ON SKIM: Wash with soap and water.

NOTE TO PEYSICIAM: Do not administer atropine unless

cholinesterase inhibition is measured or patient shows distinct symptoms thereof. Oxime therapy is contraindicated. Otherwise, administration of gastric lavage or induction

of vomiting followed by application of activated charcoal is the recommended

treatment.

## STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store in original container and keep tightly closed. Store in a cool dry place.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by incineration, or, if allowed by State and local authorities, by burning. If burned, stay out of smoke.

Do not reuse empty container.

## **GENERAL INFORMATION**

Banol® is a completely water miscible fungicide concentrate. Banol is intended for use on turtgrass which is subject to Pythium Blight (Cottony Blight, Grease Spot). It may be used after germination to control Pythium damping-off in turf, or on established turf to prevent or control Pythium Blight. Banol does not afford broad spectrum disease control for Rhizoctonia sp. (brown patch), Scierotinia sp. (dollarspot), or Helminthosporium sp. (leafspot). Use a broad spectrum fungicide if these diseases coexist with Pythium Blight.

Banol is also recommended for prevention of root rot and damping-off caused by Pythium sp. and Phytophthore sp. at all stages of ornamental propagation.

COMPATIBILITY: Banot is compatible with benomyliprodione, ethazol, chloroneb, Proxol 80SP (trichlorion), triadimeton, chlorothalonil, diazinon, chloroyrifos, and thiram.

For control of other soil borne diseases such as *Rhizoctonie* sp. or *Fusarium* sp. Banol can be tank mixed with benomyl or thiophanate-methyl. Use the full rate of each fungicide and follow all directions and restrictions appearing on the labels of these products.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

TURFGRASS	AREA	Fluid Ounces BANOL	REMARKS
For Control of Pythium Blight and Pythium Damping-Off on Established Turf and Overseeded Areas	1000 ft²	Preventative Treatment: 1 1/2-2 fluid oz. in 2-5 gallons of water. Curative Treatment: 3-4 fluid oz. in 2-5 gallons of water.	ESTABLISHED TURF: Apply as a preventive treatment during periods of high temperature and humidity favorable to the development of Pythium Blight.  OVERSEEDED AREAS: Apply after germination to control Pythium Damping-Off.  RETREATMENT: Retreat at 7-21 day intervals if conditions remain favorable for disease development. Use the lower rate for the shorter interval and the higher rate for the longer interval within the application rate range. Under severe disease pressure conditions, use the highest recommended rate and shortest interval.

Banol is recommended for prevention of root rot and damping-off caused by Pythium sp. and Phytophthora sp. at all stages of ornamental propagation.

ORNAMENTALS	Fluid Ounces BANOL	REMARKS
For Control of Pythium and Phytophthora on Ornamental Plants: African Violet Ageratum, Alyssum, Aster, Azalea, Browallia, Carnation,		Banol requires no agitation after initial mixing. Stock solutions of Banol should be used within one week of mixing. Banol does not cause phytotoxic symptoms on the listed plants when used as directed. Trials on other ornamental species should be conducted before extensive use.
Celosia, Chrysanthemum, Coleus, Dahlia, Dusty Miller, Easter Lily,	3 fl oz per 10 gallons of water	Seeding: Apply to the seeding area using 3 quarts of solution/10 square feet. Treat before sowing of seeds requiring light and after covering of seeds requiring dark for germination.
Ferns, Geranium, Gloxinia, Impatiens, Lobelia, Marigold,	3 fl oz per 10 gallons of water	Transplanting (Seedlings): Apply to the transplanting area using 3 quarts of solution/10 square feet before transplanting.
Pansy, Petunia, Poinsettia. Portulaca, Salvia, Snapdragon, Verbena,	2 fl oz per 10 gallons of water	Transplanting (Cuttings): Drench the cutting bed using 2 gallons of solution/10 square feet before serting.
Violet, and Vinca.	2 fl oz per 10 gallons of water	Potting: Dip bare root plants in the solution bafore pot- ing. After potting drench each probat the rate of 3.5 H or of solution/4 inch pot. Repeat the drench treatment at 3 to 6 week intervals.
Woody Ornamentals	2.5 fl oz per 10 gallons of water	For control of Phytophthora sp. on woody amagneptals such as azalea, drench each container at the rate of 5 quarts of solution/10 square feet of surface. Repeat the drench treatment at 3 to 4 month intervals.
