PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS WARNING

Causes substantial but temporary eye injury. May be fatal if swallowed or inhaled. Harmful if absorbed through the skin. Do not get in eyes or on clothing. Do not breathe dust. Avoid contact with skin. Wear goggles, face shield, or safety glasses. Wash thoroughly with soap and water after handling. Wash contaminated clothing with soap and hot water before reuse.

PRECAUTIONS

Use with adequate ventilation. If not adequate, wear a respirator jointly approved by the Mining Enforcement and Safety Administration (formerty U.S. Bureau of Mines) and by the National Institute for Occupational Safety and Health under the provisions of 30 CFR Part II. Keep children and pets off treated areas until spray has dried. Do not use on other crops used for food or forage. Use only according to label directions. Application at rates above those shown may result in illegal crop residues. Do not treat food crops grown in the greenhouse. Do not apply this product in such a manner as to directly or through drift expose workers or other persons. The area being treated must be vacated by unprotected persons.

DO NOT APPLY THIS PRODUCT THROUGH ANY TYPE OF IRRIGATION EQUIPMENT.

REENTRY STATEMENT: Refer to the Recommended Applications section of this label for applicable reentry interval.

Because certain states may require more restrictive reentry intervals for various crops treated with this product, consult your State Department of Agriculture for further information. Written or oral warnings must be given to workers who are expected to be in a treated area or in an area about to be treated with this product. When oral warnings are given, warnings shall be given in a language customarily understood by workers. Oral warnings must be given if there is reason to believe that written warnings cannot be understood by workers.

١

ENVIRONMENTAL HAZARDS: This product is toxic to fish and wildlife and is extremely toxic to aquatic invertebrates. Do not apply to water or wetlands (swamps, marshes, bogs and potholes). Runoff from treated areas may be hazardous to aquatic organisms in neighboring areas. Do not apply where runoff is likely to occur. Do not apply when weather conditions favor drift from areas treated. Do not contaminate water when disposing of equipment washwaters.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store in a cool, dry place (minimum 0° F, 30 day average not to exceed 100° F). Store in original container and keep closed.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then offer plastic container for recycling or reconditioning, or puncture and dispose of containers in a sanitary landfill, or by incineration, or if allowed by State and local authorities, by burning. If burned, stay out of smoke.

DO NOT REUSE THIS CONTAINER

IMPORTANT: Read these entire Directions and Conditions of Sale, including the Warranty and Disclaimer of Warranties, and Limitation of Liability provisions, before using PROXOL® 80 SP. For agricultural use and for sale to service persons. Do not store in or around the house. PROXOL insecticide offers the unique advantage of not significantly affecting beneficial insects (parasites, predators, and pollinators) especially when applied at the minimum recommended rates per acre. Thus, PROXOL supplements the natural control factors, instead of destroying them. This advantage is lost when PROXOL is used in conjunction with parathion or other nonselective insecticides. Accordingly, for most effective and most economical control, PROXOL should not be used in conjunction with or alternated in a spray schedule with pesticides destroying parasites, predators, and other beneficial insects. This applies to alfalla and cotton in particular. While PROXOL is not recommended for the control of aphids, mites, and cabbage looper, some suppression of these pests may result from recommended dosages.

LAWN CARE INDUSTRY: For the best results with PROXOL 80 SP against white grubs (Ataenius, May beetle, European chafer, Asiatic Garden beetle, Japanese beetle, Northern Masked chafer, Oriental beetle), it is recommended that watering-in take place after application in order to improve efficacy. The applicator should water OR leave written instructions for the homeowner or caretaker to water. Post treatment watering-in may be utilized up to 24 hours after application. Consideration must be given to species of grubs, and the level of infestation before impation treatment is performed.

COMPATIBILITY: PROXOL 80 SP may be applied with most commonly used insecticides. Do not mix with alkaline materials such as lime and lime sulfur.

MIXING: PROXOL 80 SP dissolves readily in water and is suitable for use in all power-operated ground sprayers and aircraft sprayers. To dissolve in water, pour the required amount of PROXOL 80 SP into full amount of water and then agitate. Use immediately after mixing. It is recommended that PROXOL 80 SP be used in sprayers equipped with 50 mesh screens. If 100 mesh screens are used, some screen clogging may occur.

RECOMMENDED APPLICATIONS

DOSAGE: Use specified dosage of PROXOL 80 SP in the amount of water necessary to give complete coverage of foliage. The type of equipment used will determine the concentration required.

SPRAYING: Complete coverage and thorough application are essential for most effective results. Schedule applications in accordance with local conditions. Consult your State Agricultural Extension Service or Experiment Station for specific timing of applications in your area. NOTE: DO NOT ALLOW PROXOL SPRAY TO DRIFT ONTO SORGHUM. TO DO SO MAY CAUSE BURNING OF THE SORGHUM OR MILO. Spray droplets from applications of PROXOL 30 SP may cause spotting of paint finishes on aluminum and steel siding, automobiles, trucks, and tractors. Do not allow spray droplets to contact metal painted surfaces. If accidental exposure does occur, the painted surface should be thoroughly washed immediately after exposure.

TURF ANJ ORNAMENTALS

REENTRY STATEMENT: Do not enter treated areas without protective clothing until sprays have dried. Refer to the preceding "Precautions" section of this label for additional details.

	Rate		
Insect	Area	Amount	Remarks
Cutworms Sod webworms	1,000 sq. ft. 5,000 sq. ft.	1½ to 3¾ oz. ½ to	Apply by means of any commercial power ground sprayer. Do not use PROXOL 80 SP in hose proportioners.
(lawn moths)	10,000 sq. ft.	1 Ib	
	20,000 sq. ft.	2 lb	For greens or other small areas—Mix specified amount of
Armyworms	30,000 sq. ft. 40,000 sq. ft.	3 kb 4 kb	PROXOL 80 SP in 5 to 10 gallons of water and apply uniformly to 1,000 sq. ft.
			For fairways and larger areas—Apply specified amount using sufficient water for complete coverage but not less than 10 gallons per acre.
			For best results, mow the turl and rake dead grass from dam- aged spots: water the turf and allow to dry before spraying. Do not water again until necessary. Apply PROXOL 80 SP when in- sect populations reach levels sufficient to warrant control measures.
White grubs	1,000 sq. ft.	3¾ 02.	Mix specified amount of PROXOL 80 SP in 15 to 30 ga!'ons of water and apply uniformly to 1,000 sq. ft. of turf. Thoroughly irrigate turf immediately after application.
			LAWN CARE INDUSTRY: For the best results with PROXOL 80 SP against White grubs (May beetle, European chafer, Asiatic Garden beetle, Japanese beetle, Northern Maskec chafer, Oriental beetle), it is recommended that post watering-in take place immediately after treatment. Post treatment watering-in may be utilized up to 24 hours after application. Consideration must be given to species of grubs, and the level of infestation, before irrigation treatment is performed.

Ornamental	Insect	Ounces PROXOL 80 SP	Remarks
	Nantucket pine tip moth Zimmerman pine moth	2	Mix specified dosage in 10 gallons of water and spray plants until they are thoroughly wet. Repeat as necessary
Flowers Shrubs and Trees	Armyworms Bagworms Climbing cutworms Dipterous leaf miners Lygus bugs Stink bugs Tarnished plant bug Tobacco budworm Webworms	2 to 3	NOTE: Phylotoxicity has occurred on certain varieties of carnations and zinniac. When large plantings of these flowers are to be sprayed for the first time, treat only a few plants and observe for 4 to 5 days before spraying the entire planting. Injury from spray droplets may occur on lear as of certain trees.
Narcissus	Narcissus buib fly	2	Apply specified dosage in 10 gallons of water as a drench per 100 feet of row. Direct stream to base of plants at beginning of adult fly activity (early May to June). Repeat treatment annually.

FARM CROPS

REENTRY STATEMENTS: Do not apply this product in such a manner as to directly or through drift expose workers or other persons. The area being treated must be vacated by unprotected persons. Do not reenter treated fields within 24 hours unless protective clothing is worn. Because certain States may require more restrictive reentry intervals for various crops treated with this product, consult your State Department of Agriculture for further information.

Written or oral warnings must be given to workers who are expected to be in a treated area or in an area about to be treated with this product. Oral warnings should include those statements found under the label heading "Precautionary Statements" and "Reentry Statements" included on this label. When oral warnings are given, warnings shall be given in a language customarily understood by workers. Oral warnings must be given if there is reason to believe that written warnings cannot be understood by workers. Written warnings must include the following information: WARNING, area treated with PROXOL® 80% Soluble Powder on (date of application). Do not reenter treated fields within 24 hours unless protective clothing is worn. If on skin, remove contaminated clothing and wash skin immediately with soap and warm water. If eyes are contaminated, flush with a gentle, steady stream of water for 15 minutes. If swallowed, vomiting should be induced (See Precautionary Statements on label).

FIELD CROPS

Стор	Insect	Ounces PROXOL 80 SP	Remarks	
Tobacco	Budworm Hornworm	20	Apply specified dosage per acre using suffi- cient water for complete coverage but not less than 1 gallon per acre. For budworm control make application directly into bud. Repeat as necessary. Do not treat within 3 days of harvest.	
	Green June beetle larvae	10	Apply specified dosage in 100 gallons of water per-100 square yards to uprooted areas of plant beds.	
	Black cutworm	20	Apply specified dosage per acre. Application may be made at transplanting or when cut- worm damage is observed in the field. For best results, use 25 to 50 gallons of water per acre on a 12 to 14 inch band and spray the entire plant and soil around the plant. Treat in early evening for best results, since cutworms are most active at night. Enide® 90W at 4.4 to 6.6 pounds per acre may be applied over the top after transplanting in com- bination with PROXOL. Enide may be applied from transplanting to 7 days after transplanting. When Enide 90W is applied more than 2 days after transplanting, tillage is required immedi- ately before or at time of application to destroy germinating weed seeds.

C

PREMISE SPRAY FOR FLY CONTROL

For Fly Control in and Around Farm Buildings (F~cept Dairy Barns and Poultry Houses): Mix 5 pounds of PROXOL 80 SP in 40 gallons of water (equivalent to 5 level tablespoonfuls per gallon) Thoroughly wet all areas to be treated by spraying 1 gallon per 500 square feet of surface area or to the point of run-off. Apply to floors, walls, ceiling, around windows, doors, and other areas where files congregate. Also spray stock pens (after removal of animals), garbage areas, and other locations where refuse has collected. Repeat applications every 1 to 2 weeks or as fly populations increase. For longer residual control, add 1 pound of sugar to each gallon of spray solution.

Restrictions (Premise Spray)

Remove animals before spraying barn. Do not treat portions of buildings where poultry feed. Direct application to walls, floors, or other surfaces previously treated with lime, whitewash, or other alkaline materials may be ineffective. Do not contaminate feed, water, or milk-handling equipment.

CONVERSION CHART

Rate/Acre Ounces	Pounds of PROXOL 80 SP to Treat:		
PROXOL 80 SP	5 Acres	10 Acres	15 Acres
5	1½	31⁄4	435
7½	21/3	435	7 •
8	21/2	5	7½
10	3%	6¼	9%
16	5	10	15
20	6¼	121/2	18%
30	9%	18%	281/4

NOTE: When using a more convenient whole number or fraction of pounds of formulated material do not exceed maximum registered rate.

By using this product, user accepts the following conditions, warranty, disclaimer of warranties and limitations of liability.

CONDITIONS: The directions for use of this product are believed to be adequate and should be followed corefully. However, because of extreme weather and soil conditions, manner of use and other factors beyond NOR-AM Chemical Company's central, it is impossible for NOR-AM to eliminate all risks associated with the use of this product. As a result, crep injury or ineffectiveness is always possible.

DIOCLAIMER OF WARRANITIES: THERE ARE NO WARRANTIES, EXPRESS OR IMPLIED, OF MERCHANTABILITY OR OF FITNESS FOR A PARTICULAR PURPOSE OR OTHERWISE, WHICH EXTEND BEYOND THE STATEMENTS MADE ON THIS LABEL. No agent of NOR-AM Chamical Company is substanded to make any warrantee bayend stose contained haven or to modily the warranties contained haven. UNDER NO CIRCUMSTANCES SHALL NOR-AM CHEMICAL COMPANY BE LIABLE FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGES RESULTING FROM FAILURE TO USE THIS PRODUCT IN ACCORDANCE WITH LABEL DIRECTIONS.

LIMITATIONS OF LIABILITY: In no event shall NOR-AM Chemical Crimpany's liability for damages arising out of the use of this product excess the purchase price of the product used.
