

MAR 16 1994

Lesley Palmer Czochoz, Ph.D.
Nor-Am Chemical Company
2711 Centerville Road
Little Falls Centre One
Wilmington, DE 19808

Dear Dr. Czochoz:

Subject: Revised labeling to clearly define application rates
Apollo^(R) SC Ovicide/Miticide
EPA Registration No. 45639-135
Amendment application of January 14, 1994

The amendment referred to above, submitted in connection with registration under FIFRA, is acceptable provided that you:

Delete the following statement:

"When applying Apollo SC alone, use of a high quality, nonionic surfactant, crop oil concentrate, silicone surfactant, or summer spray oil is recommended."

Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 Enclosure for a further description of final printed labeling

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product bearing the amended labeling constitutes acceptance of these conditions.

A stamped copy of the labeling is enclosed for your records.

Sincerely yours

DHE

Dennis H. Edwards, Jr.

OVICIDE/MITICIDE

A Suspension Concentrate (SC) Formulation for Mite Control
on Pears, Apricots, Cherries, Peaches, Nectarines, Almonds,
and Walnuts

ACTIVE INGREDIENT:	Percent by Weight
3,6-bis (2-chlorophenyl)-1,2,4-triazin-5(1H)-one	1.00
INERT INGREDIENTS:	TOTAL
Contains 1.00% of active ingredient	1.00

EPA Reg. No. 45639-135

KEEP OUT OF REACH OF CHILDREN

CAUTION

STATEMENT OF PRACTICAL TREATMENT

IF IN EYES: Flush eyes with water for at least 15 minutes. Get medical attention.
IF ON SKIN: Wash with soap and water. Get medical attention if irritation persists.

NOR-AM

NET CONTENTS

Precautionary Statements HAZARDS TO HUMANS AND DOMESTIC ANIMALS **CAUTION**

Avoid contact with skin, eyes or clothing. In case of skin contact carefully remove contaminated clothing and wash affected area with soap and water. In case of eye contact, flush eyes with plenty of water. Get medical attention if irritation persists.

PERSONAL PROTECTIVE EQUIPMENT

Some materials that are chemical-resistant to this product are listed below. If you want more options, follow the instructions for category C on an EPA chemical resistance category selection chart.

Applicators and other handlers must wear:

- > Long-sleeved shirt and long pants
- > Chemical-resistant gloves, such as barrier laminate, butyl rubber, nitrile rubber, neoprene rubber, polyvinyl chloride (PVC), or Viton
- > Shoes plus socks

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

ENGINEERING CONTROLS STATEMENT

When handlers use closed systems, enclosed cabs, or aircraft in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240 (d) (4-6)], the handler PPE requirements may be reduced or modified as specified in the WPS.

USER SAFETY RECOMMENDATIONS

Users should:

- > Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.

ENVIRONMENTAL HAZARDS—For terrestrial uses, do not apply directly to water, or to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not apply when weather conditions favor drift from treated area. Do not contaminate water when disposing of equipment wash waters.

IN CASE OF FIRE, LEAKY, OR DAMAGED CONTAINERS OR OTHER EMERGENCY, REPORT AT ONCE BY TOLL-FREE TELEPHONE TO: 800-424-9300.

IMPORTANT—Read the entire Directions for Use and Disclaimer of Warranties before using this product.

STORAGE AND DISPOSAL

Prohibitions: Do not contaminate water, food or feed by storage or disposal.

Storage: Store in original container, tightly closed, in a safe place.

Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal: Triple rinse (or equivalent) Then offer for recycling or reconditioning or puncture and dispose of in a sanitary landfill, by incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

DO NOT RE-USE EMPTY CONTAINER

Directions for Use

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), and restricted-entry interval.

The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 12 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:

- > Coveralls
- > Chemical-resistant gloves such as barrier laminate, butyl rubber, nitrile rubber, neoprene rubber, polyvinyl chloride (PVC), or Viton
- > Shoes plus socks

Use Precautions

- > **IMPORTANT: DO NOT MAKE MORE THAN 1 APPLICATION OF APOLLO SC PER SEASON.**
- > Do not graze livestock in treated areas or harvest cover crop for livestock feed.
- > Do not apply this product through any type of irrigation system.

General Information

APOLLO SC is a specific miticide which acts as an ovicide. APOLLO SC is not disruptive to beneficial insects and mites. It has good residual activity on European red mites, McDaniel mites, Pacific spider mites, two-spotted spider mites, and Yellow spider mites when applied according to label directions.

For Use on Pears, Apricots, Cherries, Peaches, Nectarines, Almonds, and Walnuts

Because APOLLO SC acts primarily against the egg, apply APOLLO SC at the first sign of mite activity. If the mite population is approaching damaging levels, combine APOLLO SC with an appropriate adulticide.

Recommendations For Use

TARGET SPECIES:

European red mite	<i>Panonychus ulmi</i>
McDaniel spider mite	<i>Tetranychus mcdenieli</i>
Pacific spider mite	<i>Tetranychus pacificus</i>
Two-spotted spider mite	<i>Tetranychus urticae</i>
Yellow spider mite	<i>Eotetranychus carpini borealis</i>

Rate & Timing of Application

Crop	Rate/Acre	Timing	PHI*
Pears	4-8 oz.	First sign of mites	21 days
Apricots, Cherries	2-8 oz.**	First sign of mites	21 days
Peaches, Nectarines	4-8 oz.**	First sign of mites	21 days
Almonds, Walnuts	2-8 oz.**	First sign of mites	30 days

*PHI = Pre-Harvest Interval, the latest timing for an application prior to harvest.

**Applications with rates below 4 ounces of APOLLO SC per acre are recommended only in association with established IPM programs and only when adequate beneficial insects/mites are prevalent.

Factors which warrant higher rates (4-8 ounces) of APOLLO SC per acre include:

1. For control of Pacific spider mites.
2. For control of McDaniel spider mites
3. Earliest seasonal timings for blocks with high overwintering European red mite egg populations.
4. When mite predator populations are low.
5. To ensure adequate coverage of full size standard trees and/or trees with heavy leaf densities.

Application Method

APOLLO SC may be applied by ground using either dilute or concentrate spray equipment. Do not apply by air.

Pears

50-400 gallons per acre: Apply 4-8 ounces of APOLLO SC per acre. Use sufficient volume of water to obtain complete coverage but not less than 50 gallons per acre.

For applications above 400 gallons per acre: Use 1-2 ounces of APOLLO SC per 100 gallons of spray. Do not apply less than 4 ounces of APOLLO SC per acre.

Apricots, Cherries, Peaches, and Nectarines

50-400 gallons per acre: Apply 2-8 ounces of APOLLO SC per acre.

Almonds and Walnuts

50-400 gallons per acre: Apply 2-8 ounces of APOLLO SC per acre. Use at least 4 ounces of APOLLO SC south of California Highway No. 152. A tank-mix of APOLLO SC with an adulticide may be warranted when adult mites are present. Do not use the tank-mix under conditions where the adulticide alone is not recommended. Before use, read the adulticide label for additional information and precautions.

When applying APOLLO SC alone, use of a high quality, nonionic surfactant, crop oil concentrate, silicone surfactant, or summer spray oil is recommended.

Managing Mite Resistance

Repeated use of miticides with a similar mode of action may lead to build-up of resistant strains of mites. For good resistance management practices, NOR-AM Chemical Company recommends that the ovicide APOLLO SC be applied only once per season. If additional miticide applications are needed, use a miticide with a different mode of action.
