OF AND DISDOSAL

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS (and Domestic Animals) DANGER

PRECAUTIONARY STATEMENTS
CORROSIVE. CAUSES IRREVERSIBLE EYE
DAMAGE. DO NOT GET IN EYES OR ON
CLOTHING. HARMFUL IF SWALLOWED OR INHALED. AVOID BREATHING VAPOR OR SPRAY
MIST.

PERSONAL PROTECTIVE EQUIPMENT

Some materials that are chemical-resistant to this product are listed below. If you want more options, follow the instructions for Category B on an EPA chemical resistance category selection chart.

Applicators and other handlers must wear:

- > Long-sleeved shirt & long pants
- ➤ Shoes plus socks
- > Protective eyewear

)

Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product's concentrate. Do not reuse them. Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

ENGINEERING CONTROLS STATEMENT

When handlers use closed systems, enclosed cabs, or aircraft in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240 (d) (4–6)], the handler PPE requirements may be reduced or modified as specified in the WPS.

USER SAFETY RECOMMENDATIONS

Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.

Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

ENVIRONMENTAL HAZARDS

THIS PESTICIDE IS TOXIC TO FISH AND AQUATIC ORGANISMS. FOR TERRESTRIAL USES, DO NOT APPLY DIRECTLY TO WATER, OR TO AREAS WHERE SURFACE WATER IS PRESENT, OR TO INTERTIDAL AREAS BELOW THE MEAN HIGH WATER MARK. DRIFT AND RUNOFF FROM TREATED AREAS MAY BE HAZARDOUS TO FISH AND AQUATIC ORGANISMS IN ADJACENT AQUATIC SITES. DO NOT CONTAMINATE WATER THROUGH DISPOSAL OF EQUIPMENT WASHWATERS.

PHYSICAL OR CHEMICAL HAZARDS
DO NOT USE OR STORE NEAR HEAT OR OPEN
FLAME.

STORAGE AND DISPOSAL

STORAGE: Store in original container and keep closed. Store in a cool, dry place. Do not use or store near heat or open flame. Protect NA 308 from freezing temperatures.

PESTICIDE DISPOSAL: Do not contaminate water, food or feed by storage or disposal. Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: ECHO-SYSTEM SVR Return Procedure: Return the ECHO-SYSTEM SVR container clean (outside only) and empty to the place of business from which the NA 308 was purchased.

IN CASE OF FIRE, LEAKY OR DAMAGED CONTAIN-ERS, OR OTHER EMERGENCY, REPORT AT ONCE BY TOLL-FREE TELEPHONE TO: 800-424-9300.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read the entire Directions for Use before using this product. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard 40 CFR Part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notitication, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval. The requirements in this box only apply ouses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 24 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water is:

- > Coveralls
- ➤ Water-proof gloves
- > Shoes plus socks
- > Protective eyewear

BEST AVAILABLE COPY

4016

When used as directed, NA 308 is selective in beets past the two-true leaf stage. Beets may be severely injured if treated before the two-true leaf stage. The stage of growth of the weeds is very important for satisfactory control. For best results, spray when the weeds are at the two-true leaf stage. Best results are obtained when the weeds are actively growing and are not under water or heat stress.

Mixing the Spray: Make sure the Sprayer is CLEAN. NA 308 contains sufficient wetting agents for optimum coverage. Do not add additional wetting agents or other spray adjuvants. Add sufficient water to fill the lines. Then add the desired amount of NA 308 and the remaining quantity of water with the bypass agitator running. Bypass agitation is sufficient. Mechanical agitation is not necessary. Only use freshly prepared spray emulsions.

Always spray immediately after preparing the spray solution. Prepare only enough spray solution to last less than four hours.

GENERAL INFORMATION

NA 308 is a selective postemergence herbicide for use in sugar beets (including beets grown for seeds) for the control of the following weeds.

	~ ·
Annual bluegrass	Poa annua
Annual sowthistle	Sonchus oleraceus
Black nightshade	Solanum nigrum
Hairy nightshade	
Canary grass	
Coast fiddleneck	
Common chickweed	Stellaria media
Common lambsquarters	
Common ragweed	Ambrosia artemisiifolia
Green foxtail	
Groundcherry	
Kochia*	
Ladysthumb	Polygonum persicaria
London rocket	Sisymbrium irio
Nettleleaf goosefoot	Chenopodium murale
Pennsylvania smartweed F	olygonum pennsylvanicum
Pigeon grass (yellow foxtail)	
Prostrate pigweed	
Purslane	
Redroot pigweed	
Shepherdspurse	
Wild buckwheat	
Wild mustard	
4 4 11 M 11 1 1 1 1 1 1 1 1 1 1 1 1 1 1	

^{*} Spray kochia while in the rosette stage, less than 1* in diameter. Fo: best results, spray when the weeds are at the two-leaf stage.

USE PRECAUTIONS: DO NOT APPLY NA 308 TO SUGAR BEETS LATER THAN 75 DAYS PRIOR TO HARVEST.

DO NOT EXCEED A TOTAL OF 13.0 PINTS NA 308 PER ACRE PER SEASON.

DO NOT APPLY THIS PRODUCT THROUGH ANY TYPE OF IRRIGATION SYSTEM.

NA 308 MAY CAUSE BEET INJURY IF THE CROP IS UNDER STRESS FROM ONE OR MORE OF THE FOLLOWING CONDITIONS:

- A Rapid c!:matic changes from cool, overcast days, to hot (85° or over) bright days. When the air temperature is, or is likely to be, above 80°F on the day of spraying, application should be made in the evening when the temperature is lower.
- ▲ Windy conditions or drought.
- ▲ Use of a preplant or preemergence herbicide or other chemicals.
- Insect or disease injury.
- ▲ Close cultivation.

If stress conditions are present delay application in order to give plants a chance to recover.

If extreme weather conditions are of short duration, delay spraying until the end of such a period. If NA 308 applications must be made on days with extreme temperature and/or brightness, delay spraying until evening.

DO NOT OVERTREAT: The use of higher than recommended rates may cause beet injury.

Do not spray while dew is present.

Rainfall within 6 hours of spraying may reduce weed kill. Do not allow spray drift to contact adjacent crops which may be injured by spray drift.

IMPORTANT: NA 308 may cause temporary growth retardation and/or chlorosis or tipburn on sugar beets. Beets usually resume normal growth within 10 days.

RATE OF APPLICATION

By Ground: Apply NA 308 at the rate of 3.25 to 5.0 pints in 20 to 50 gallons water broadcast basis. For band application, see dosage chart.

By Air: Apply NA 308 at the rate of 3.25 to 5.0 pints per acre using 5 to 15 gallons of spray per acre.

Apply the 3.25 to 5.0 pint rates only to sugar beets past the two-true leaf stage. Use the 5.0 pint rate only on well established beets which are not under stress.

In order to avoid phytotoxic spray drift to non-target crops during application of NA 308, the following buffer zones should be observed:

Cotton, Potatoes, Sunflowers,

Sorghum, Wheat	50 feet
Blackeye beans, Cabbage, Flax	
Lettuce, Rape, Tomatoes	300 feet
DO NOT APPLY WHEN WIND SPEED IS ON	
MILES PER HOUR, AVOID APPLICATION'S	
CONDITIONS FAVOR DRIFT	••••

To avoid excessive phytotoxicity to fall-planted sugar beets in Arizona and south of the Tehachapi Mountains in California when temperatures are above 85° F, apply NA 308 at the rate of 3.25 pints per acre (broadcast equivalent). Evening applications are recommended.

For further information, contact your County Agricultural Agent, Farm Advisor or NOH-AM Chemical Company.

REPEAT APPLICATION OF NA 308: For control of later germinating weeds, make a second application of NA 308. Use 3.25 to 5.0 pints of NA 308. Allow at least 7 days between first and second applications. Apply when beets have at least 4 leaves. For best results, use the higher rate and spray when weeds are at the two-true leaf stage. Apply lower rates when the beets are under stress as explained on the previous page, the General Information section.

SPLIT (LOW RATE) APPLICATIONS: Split (low rate) applications of NA 308 may be applied to sugar beets to control early germinating weeds. The first spray must be applied when the earliest emerging weeds have reached cotyledon size. See Chart 1, below, for broadcast rates. See Chart 2, below, for equivalent band rates. For band applications, apply in 5-10 gallons of water per acre. Any weeds which are not completely controlled by the first treatment will usually be checked and controlled by repeat applications. The repeat application should be made 5 to 7 days after the preceding application or when another flush of weeds germinates. If the second application is delayed, conventional treatment as described above will be necessary. NA 308 broadens and enhances the control of troublesome weeds, including the following:

ANNUAL BROADLEAF WEEDS

.)

Annual sowthistle	Sonchus oleraceus
Black nightshade	Solanum nigrum
Hairy nightshade	Solanum sarrachoides
Coast fiddleneck	
Common chickweed	Stellaria media
Common lambsquarters	

Common ragweed	Ambrosia artemisiifolia
	Physalis lanceifolia
	Kochia scoparia
	Polygonum persicaria
	Sisymbrium irio
	Chenopodium murale
	Polygonum pennsylvanicum
	Amaranthus gracizans
	Portulaca oleraceus
	Amaranthus retroflexus
	Capsella bursa-pastoris
Wild buckwheat	Polygonum convolvulus
	Brassica kaber
* Spray Kochia while in th	e rosette stage, less than one

ANNUAL GRASS WEEDS

inch in diameter.
