## GENERAL INFORMATION

BUCKBACK™ can be used to protect nursery stock, shrubs and ornamentals from rabbit, deer and rodent depredation. One application will protect treated parts from 1 to 3 months, depending upon weather conditions. This product can also be used a repellent in deterring deer from moving into unwanted areas as a result of local feeding and browsing. The addition of a latex based sticker prolongs the residual effectiveness of the treatment. Repellency is the result of rendering the treated plant parts distasteful. Some feeding may occur. As always, read and follow label directions for best results.

## DEER, RABBIT AND RODENT REPELLENCY

### Spray Applications: Growing Season

Add 1 quart BUCKBACK™ to 7 quarts of water and apply as a full coverage spray to all portions of the plant to be protected. Spray to runoff. For greater retention and residual efficacy add 1 pint of latex based sticker to the spray solution. Do not use wetting agents or surfactants as foliar damage may result. For best results spray when temperatures are greater than 40°F and relative humidity is less than 70 percent. Coverage depends on plant density.

### Spray Application: Tree Trunks and Dormant Plants

Add 1 quart of BUCKBACK™ to 3 quarts of water and apply as a spray to all portions of the plant to be protected. Spray to runoff. For greater retention and residual efficacy add 1 pint of latex based sticker to the spray solution.

### Brush On Application:

Add BUCKBACK™ undiluted with a paintbrush to stem parts and trunks to be protected. For greater retention and residual efficacy blend 4 fluid ounces of latex based sticker into 1 gal. of BUCKBACK™ prior to brushing.

### Deer Repellency:

BUCKBACK™ is useful as a repellent for deterring deer from migrating into unwanted areas. It works by discouraging deer from localized feeding and browsing. The product is most effective when used in combination with mechanical deterrents such as ditches, fences, etc. Prepare and spray BUCKBACK™ exactly as for rabbit and rodent repellency (above), depending upon season and type of application desired. Spray to a height of 5 feet (1.5 meters).
